The Liquid Audio Indie 1000 Program

Sell Your Music Online

Now you can put your music directly into the hands - and ears - of millions of people who can decide for themselves if they like what they hear. Liquid Audio provides tools to distribute CD quality, copyright protected audio over the Internet, so you can play, promote, and sell you music to a worldwide audience - without compromise. Additionally, Liquid Audio provides the [Indie 1000 Spotlight](#) , an area dedicated to promoting and displaying the albums and artists currently in the Indie 1000 program.

 Indie 1000

How It Works

With the Indie 1000 program, fans who visit your website will be able to listen to your music with the highest quality sound available on the Internet using the Liquid MusicPlayer. They will also be able to purchase your music in Liquid Track format for download onto their PCs. Once the Liquid Tracks have been downloaded, they may be played on your PC sound system or stored permanently on CD-Recordable disk, which can then be played in any standard CD player.

Sell Up To Fifteen Songs

As a Liquid Audio Indie 1000 member, you get to include up to fifteen different songs for music consumers to buy and download to their PCs. This means you could sell different songs from different albums or an entire album of songs. You also get to have up to fifty preview clips of your songs for fans to browse. Links will be available for you to connect to online retailers. Millions of music fans will be able to order your CD's or download your singles.

Safe, Secure Sound

The Liquid Audio system combines sophisticated multi-layer encryption with inaudible digital watermarking technology to protect your intellectual property. This advanced system provides the most comprehensive, anti-copy and anti-piracy technology available today. The music stays with the person who paid for it and no one else. Liquid Audio's security partners include Intel Corporation and RSA Data Systems, the leading supplier of encryption tools.

Instantly Connect to Music Fans

When a music fan wants to buy your music they just click on 'Buy Download' in the Liquid MusicPlayer and enter the necessary payment information. You determine the price for the songs. You can even make your songs available for free for promotional purposes. Fans can also use the 'Order CD' to purchase the complete CD for shipment directly to their homes.

Who's on first?

about who likes and buys your music. Through your Web browser, you have instant access to reports that give you complete sales and listening data. You are connected directly to your fans and your fans are connected directly to you.

What Do You Need?

1. A Windows 95 computer with access to the Internet
2. A website
3. A DAT or CD-ROM of your music
4. Album art or graphics
5. Rights to sell your music

What Do You Get?

1. Liquifier Pro v2.0 - Professional Internet mastering tool
2. Liquid MusicServer - 5 stream / 15 songs / 50 clips
3. Web page templates - to allow fast integration of Liquid Audio with your site

What do you think?

Now the only thing keeping people from buying your music is your music. For more information email us at Sales@liquidaudio.com. And stop by the [Indie 1000 Spotlight](#) to hear the artists currently with the program.
