Table of Contents

price offerings during 2007. *TradeStation* (both as a subscription service and as a brokerage account trading platform) also offers our *OptionStation* and *RadarScreen* functions and features. *OptionStation*, also an award-winning technology, is an options trading analysis product for equity, index and futures options that enables traders to explore options trading strategies. *RadarScreen* enables traders to scan securities markets to identify potential buying or selling opportunities based upon the traders' own trading strategies.

We ceased marketing our legacy software products in May 2000 and ceased marketing our subscription software services in December 2000. Accordingly, in 2004, 2005 and 2006, and, we expect, for the foreseeable future, our brokerage operations produced and should continue to produce the majority of our revenues. In 2004, 2005 and 2006, revenues from brokerage services (consisting primarily of brokerage commissions and fees and net interest income) accounted for approximately 86%, 89% and 92%, respectively, of our total consolidated net revenues, and software products and services accounted for approximately 14%, 11% and 8%, respectively, of our total consolidated net revenues over that three-year period.

Sales and Marketing

Our marketing in 2006 consisted principally of print advertising in *Active Trader*, *Futures*, *SFO*, and *Technical Analysis of Stocks & Commodities* magazines, direct mail and e-mail, sales seminars, and our Web sites, and television advertising on financial news channels. The mix and frequency of television, print, Web-site, direct-mail and in-person marketing methods that we use to try to achieve results will likely be continually modified as we test such methods and mixtures and analyze and interpret the results.

Revenues derived from customers outside of the United States for the years ended December 31, 2006, 2005 and 2004, were approximately 11%, less than 10% and approximately 12%, respectively. International revenues are collected in U.S. dollars. We conduct no marketing, sales or other operations, and maintain no assets, outside of the United States, other than relating to our start-up operations in London via our United Kingdom subsidiary, TradeStation Europe Limited.

Strategic Relationships

Clearing Services. Our brokerage's clearing services for institutional securities accounts, and for all futures accounts, are currently provided by Bear, Stearns Securities Corp. and R.J. O'Brien & Associates, Inc., respectively, pursuant to industry-standard clearing agreements.

Forex Deal Services. Our forex deal services are currently provided through an arrangement with GAIN Capital Group, Inc. Forex customers design, test, optimize and automate their forex strategies using *TradeStation*, then, when a deal order is to be placed, the customer connects directly to GAIN Capital's online deal system, and places the order. GAIN Capital is the counterparty/principal for each forex deal.

Technology Development

We believe that our success depends, in large part, on our ability to offer unique, Internet-based trading technologies with state-of-the-art order execution technologies, and continuously enhance those technologies, as well as develop and implement well-designed and user-friendly Web sites. To date, we have relied primarily on internal development of our products and services. We

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
