**TRADE TECHNOLOGIES INTERNATIONAL, INC.
Patent Owner**

Patent No. 7,533,056

**DECLARATION OF KENDYL A. ROMÁN
IN SUPPORT OF PETITION FOR
COVERED BUSINESS METHOD REVIEW OF U.S. PATENT 7,533,056**

I, Kendyl A. Román, declare as follows:

1. I have been engaged by Sterne, Kessler, Goldstein & Fox P.L.L.C. on behalf of Petitioner, TD Ameritrade Holding Corp., for the above-captioned covered business method review proceeding. I understand that this proceeding involves United States Patent 7,533,056, entitled “User interface for an electronic trading system,” by Richard W. Friesen, filed May 3, 2006 and issued May 12, 2009, (the “‘056 Patent”). I understand that the ‘056 Patent is currently assigned to Trading Technologies International, Inc. (“TTI”).

2. I understand the ‘056 Patent is a continuation of Application No. 09/289,550, filed on April 9, 1999, issued as U.S. Patent No. 7,212,999. For purposes of the covered business method review, I assume the earliest possible priority date of the ‘056 Patent is the April 9, 1999 filing date of U.S. Patent No. 7,212,999.

3. I have reviewed and am familiar with the specification of the ‘056 Patent. I understand that the ‘056 Patent has been provided as Exh. 1001. I will cite to the specification using the following format (‘056 Patent, 1:1-10). This example citation points to the ‘056 Patent specification at column 1, lines 1-10.

4. I have reviewed and am familiar with the file history of the ‘056 Patent. I understand that the file history has been provided as Exh. 1002.

5. I have also reviewed and am familiar with the following prior art used in the Petition for Covered Business Method Review of the '056 Patent:

- A certified translation of “System for Buying and Selling Futures and Options Transaction Terminal Operational Guidelines” (“TSE”) and the original figures in the Japanese-language original. The translation is Exhibit 1004, and the original is Exhibit 1003.
- U.S. Patent No. 5,375,055 to Togher et al. (“Togher”), Exhibit 1008.
- U.S. Patent No. 5,619,631 to Schott (“Schott”), Exhibit 1009.
- U.S. Patent No. 5,136,501 to Silverman et al. (“Silverman”), Exhibit 1010.
- U.S. Patent No. 5,414,809 to Hogan (“Hogan”), Exhibit 1011.

A complete listing of additional materials considered and relied upon in preparation of my declaration is provided as Exh. 1034. I have relied on these materials to varying degrees. Citations to these materials that appear below are meant to be exemplary but not exhaustive.

6. The '056 Patent describes a graphical user interface for electronic trading systems. '056 Patent, Title, 1:15-17. I am familiar with the technology described in the '056 Patent as of the earliest possible priority date of the '056 Patent (April 9, 1999).

7. I have been asked to provide my technical review, analysis, insights and opinions regarding the '056 Patent and the above-noted references

that form the basis for the grounds of rejection set forth in the petition for Covered Business Method Review of the '056 Patent.

I. QUALIFICATIONS

8. See my Curriculum Vitae, provided as Exh. 1033, for a listing of my qualifications. This includes a list of publications for the past 10 years or more.

9. My expertise qualifies me to do the type of analysis required in this case. Of particular relevance, I have been involved in the design, implementation, testing, and analysis of computer software, firmware, and hardware for over thirty years, including software architecture, graphical user interfaces, trading systems, and other networked, data-driven, client-server systems. My work has included analysis of trading systems including source code and user interfaces. In addition, I have practical experience in the design and programming of a variety of computer systems ranging from handheld devices, to laptops and desktop computers, to large multi-layer networked database systems.

10. As a freshman at Brigham Young University ("BYU") in 1976, I started writing programs for IBM computers.

11. In 1980, I worked with Apple II computers and wrote computer programs having graphic user interfaces.

12. In the late 1960's and 1970's the University of Utah was known for its pioneering work in computer graphics (and the Internet¹). At BYU, I got involved with computer graphics and wrote graphics programs. Many of my BYU professors had been at the University of Utah during its computer science pioneering years. One of my BYU professors, Alan Ashton, and a fellow computer science student, Bruce Bastian, worked together on word processing software with graphical display. Later, Professor Ashton and Bruce Bastian founded WordPerfect.

13. I graduated with High Honors from Brigham Young University where I received a Bachelor of Science degree in Computer Science. My formal studies included computer architecture, computer programming, programming languages, algorithms, operating systems, database systems, and digital logic design.

14. In 1981, I worked at International Business Machines ("IBM") in San Jose, CA. At IBM, I had a graphics display on my desk and wrote programs that displayed custom graphics. During my employment at IBM, the IBM PC was released. The IBM PC also supported graphical user interfaces.

¹ In 1969, University of Utah was one of the first four nodes on the Internet.

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
