DECISION  
Denying Petitioner's Request for Rehearing  
*37 C.F.R. § 42.71*

## I. INTRODUCTION

On March 21, 2016, IBG LLC, Interactive Brokers LLC, TradeStation Group, Inc., TradeStation Securities, Inc., TradeStation Technologies, Inc., and IBFX, INC. (collectively, “Petitioner”) filed a Request for Rehearing (Paper 31, “Req. Reh’g”) of our Decision (Paper 26, “Dec.”) denying *inter partes* review of Petitioner’s challenges to U.S. Patent No. 7,676,411 (Ex. 1001, “the ’411 patent”) based on Silverman<sup>1</sup>, Gutterman<sup>2</sup>, Belden<sup>3</sup>, and Togher<sup>4</sup> (claims 1–10 and 12–28) and based on Silverman, Gutterman, Belden, Togher, and Paal<sup>5</sup> (claim 11) (“the Silverman challenges”).<sup>6</sup>

Petitioner’s Request alleges that

The Board erred when it denied instituting review of claims 1–28 based on the Silverman combinations (*i.e.*, Grounds 2 and 3) because it misapprehended the Petition as relying on Gutterman **alone** to disclose these limitations, Decision at 22, and overlooked key arguments in the Petition that the combination of Silverman and Gutterman teaches the “moving” limitations, Pet. at 41–43.

Req. Reh’g 2.

## II. STANDARD OF REVIEW

Under 37 C.F.R. § 42.71(c), “[w]hen rehearing a decision on petition, a panel will review the decision for an abuse of discretion.” Abuse of discretion occurs when a “decision was based on an erroneous conclusion of

<sup>6</sup> Our Decision granted *inter partes* review with respect to other challenges.

law or clearly erroneous factual findings, or . . . a clear error of judgment.” *PPG Indus. Inc. v. Celanese Polymer Specialties Co.*, 840 F.2d 1565, 1567 (Fed. Cir. 1988) (citations omitted). In its request for rehearing, the dissatisfied party must identify the place in the record where it previously addressed each matter it submits for review. 37 C.F.R. § 42.71(d).

### III. ANALYSIS

Petitioner acknowledges that “[t]he Decision correctly noted that footnote 3 [on page 41 of the Petition] states: ‘Gutterman discloses the movement of bid/asks along a price axis,’” but contends that we misapprehended that footnote as addressing the “moving” limitation. Req. Reh’g 3 (citing Dec. 21–22; Pet. 41). Petitioner contends that footnote 3 does not address the “moving” limitation and, instead, contends that “[t]he Petition addresses the ‘moving’ limitations in Section VI(G)(5), which explains that the combination of Silverman and Gutterman teaches the ‘moving’ limitations.” *Id.* (citing Pet. at 41–43).

Initially, we note that claims 1 and 26 each require “displaying . . . a first indicator representing quantity associated with at least one trade order to buy the commodity at the current highest bid price” and “displaying . . . a second indicator representing quantity associated with at least one trade order to sell the commodity at the current lowest ask price.” The claims require displaying the first indicator at a first graphical location along a price axis in a bid display region and *moving* the first indicator relative to the price axis to a second graphical location in the bid display region “upon receipt of market information comprising a new highest bid price.” The claims require displaying the second indicator at a first graphical location

along the price axis in an ask display region and *moving* the second indicator relative to the price axis to a second graphical location in the ask display region “upon receipt of market information comprising a new lowest ask price.” The “moving” limitations referenced by Petitioner are those emphasized above.

When reaching our determination that Petitioner had failed to demonstrate that it is more likely than not that the challenged claims are unpatentable under 35 U.S.C. § 103 based on the Silverman challenges, we considered the entirety of Petitioner’s arguments on pages 41–43 of the Petition, which are referenced in this Request for Rehearing. *See* Dec. 21–22. We read the Petition as asserting that “Gutterman discloses the movement of bid/asks along a price axis,” which Petitioner acknowledges is the statement set forth in the Petition. *See id.* (citing Pet. 40–41 n.3); Req. Reh’g 3. As noted above, Petitioner now clarifies that it does not rely on Gutterman as teaching the “moving” limitation. Any misapprehension regarding this argument, however, is not sufficient for a modification to our Decision. Rather, we read the Petition as advancing that position because it was the only assertion of any teaching of the “moving” limitation in the Silverman challenges, and the additional discussion in the cited pages of the Petition is nothing more than conclusory statements regarding why the “moving” limitations would have been obvious.

Limiting our review to Section VI(G)(5) of the Petition, as Petitioner now requests (i.e., without the statement in footnote 3 discussed above), we note that the Petition provides only a conclusory assertion that the “moving” limitation would have been obvious. *See* Pet. 42–43. The Request for

Rehearing makes this clear, stating that the limitation would have been obvious because

the **combination** GUI of Silverman and Gutterman would always display the best inside price along a price axis. And when it receives a new best inside price, the indicators associated with the new best inside price would be displayed at their appropriate price level(s)—i.e., move along the price axis.

Req. Reh'g 5. Noticeably lacking from the Petition (and the Request for Rehearing's characterization of the Petition) is any explanation as to why "the combination GUI of Silverman and Gutterman" would have a fixed price axis where the indicators move, rather than a moving (i.e., dynamic) price axis where the indicators move.

Accordingly, we are not persuaded that we erred in denying institution of the Silverman challenges.

#### IV. ORDER

For the reasons given, it is

ORDERED that Petitioner's Request is *denied*.

# Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

## Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

## Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

## Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

## API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

## LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

## FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

## E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
