McGraw-Hill Dictionary of Scientific and Technical Terms

Fifth Edition

Sybil P. Parker
Editor in Chief

Included in this Dictionary are definitions which have been published previously in the following works: P. B. Jordain, *Condensed Computer Encyclopedia*, Copyright © 1969 by McGraw-Hill, Inc. All rights reserved. J. Markus, *Electronics and Nucleonics Dictionary*, 4th ed., Copyright © 1960, 1966, 1978 by McGraw-Hill, Inc. All rights reserved. J. Quick, *Artists' and Illustrators' Encyclopedia*, Copyright © 1969 by McGraw-Hill, Inc. All rights reserved. *Blakiston's Gould Medical Dictionary*, 3d ed., Copyright © 1956, 1972 by McGraw-Hill, Inc. All rights reserved. T. Baumeister and L. S. Marks, eds., *Standard Handbook for Mechanical Engineers*, 7th ed., Copyright © 1958, 1967 by McGraw-Hill, Inc. All rights reserved.

In addition, material has been drawn from the following references: R. E. Huschke, *Glossary of Meteorology*, American Meteorological Society, 1959; *U.S. Air Force Glossary of Standardized Terms*, AF Manual 11-1, vol. 1, 1972; *Communications-Electronics Terminology*, AF Manual 11-1, vol. 3, 1970; W. H. Allen, ed., *Dictionary of Technical Terms for Aerospace Use*, 1st ed., National Aeronautics and Space Administration, 1965; J. M. Gilliland, *Solar-Terrestrial Physics: A Glossary of Terms and Abbreviations*, Royal Aircraft Establishment Technical Report 67158, 1967; *Glossary of Air Traffic Control Terms*, Federal Aviation Agency; *A Glossary of Range Terminology*, White Sands Missile Range, New Mexico, National Bureau of Standards, AD 467-424; *A DOD Glossary of Mapping, Charting and Geodetic Terms*, 1st ed., Department of Defense, 1967; P. W. Thrush, comp. and ed., *A Dictionary of Mining, Mineral, and Related Terms*, Bureau of Mines, 1968; *Nuclear Terms: A Glossary*, 2d ed., Atomic Energy Commission, F. Casey, ed., *Compilation of Terms in Information Sciences Technology*, Federal Council for Science and Technology, 1970; *Glossary of Stinfo Terminology*, Office of Aerospace Research, U.S. Air Force, 1963; *Naval Dictionary of Electronic, Technical, and Imperative Terms*, Bureau of Naval Personnel, 1962; *ADP Glossary*, Department of the Navy, NAVSO P-3097.

When ordering this title, use ISBN 0-07-113584-7.

tube of the recoilless type and a very light mount. { ri'koi-las 'rif-əl }

recoil mechanism [ORD] A hydraulic-, pneumatic-, or spring-type shock absorber that decreases the energy of the recoil gradually and so avoids violent movement of the gun. { 'rē,kōil ,mek-ə,niz-əm }

recoil milking [NUCLEO] A technique for detecting transmutation recoil atoms knocked out of a target by heavy-ion bombardment, in which the atoms come to rest in a stream of helium or other gas which carries them through an orifice to a rough vacuum where they are adsorbed on a surface and their radioactivity detected. { 'rē,kōil ,milk-iŋ }

recoil oil [MATER] A neutral, constant-viscosity oil used in hydropneumatic and hydrospring recoil systems. { 'rē,kōil ,ōil }

recoil particle [PHYS] A particle that has been set into motion by a collision or by a process involving the ejection of another particle. { 'rē,kōil ,pārd-ə-kəl }

recoil pit [ORD] Pit dug near the breech of a gun to provide space for the breech when it moves backward during recoil. { 'rē,kōil ,pit }

recoil velocity [ORD] Velocity in recoil of the recoiling parts of a gun. { 'rē,kōil və,lis-əd-ē }

recombinant [GEN] Any new cell, individual, or molecule that is produced in the laboratory by recombinant deoxyribonucleic acid technology or that arises naturally as a result of recombination. { rē'kām-bə-nənt }

recombinant technology [GEN] 1. In genetic engineering, laboratory techniques used to join deoxyribonucleic acid (DNA) from different sources to produce novel DNA. Also known as gene splicing. 2. In genetic engineering, laboratory techniques used to join ribonucleic acid (RNA) from different sources to produce novel RNA. { ri'kām-bə-nənt tek'näl-ə-jē }

recombination [GEN] 1. The occurrence of gene combinations in the progeny that differ from those of the parents as a result of independent assortment, linkage, and crossing-over. 2. The production of genetic information in which there are elements of one line of descent replaced by those of another line, or additional elements. [PHYS] The combination and resultant neutralization of particles or objects having unlike charges, such as a hole and an electron or a positive ion and a negative ion. { ,rē,kām-bə'nā-shən }

recombination coefficient [ELECTR] The rate of recombination of positive ions with electrons or negative ions in a gas, per unit volume, divided by the product of the number of positive ions per unit volume and the number of electrons or negative ions per unit volume. { ,rē,kām-bə'nā-shən ,kō-i ,fish-ənt }

recombination electroluminescence See injection electroluminescence. { ,rē,kām-bə'nā-shən i ,lek-trō ,li-mə'nes-əns }

recombination energy [PHYS] The energy released when two oppositely charged portions of an atom or molecule rejoin to form a neutral atom or molecule. { ,rē,kām-bə'nā-shən ,en-ə-rjē }

recombination frequency [GEN] The number of recombinants divided by the total number of progeny. { rē'kām-bə'nā-shən ,frē-kwən-ēš }

recombination mosaic [GEN] A mosaic produced as the result of somatic crossing-over. { ,rē,kām-bə'nā-shən mō ,zā-ik }

recombination radiation [SOLID STATE] The radiation emitted in semiconductors when electrons in the conduction band recombine with holes in the valence band. { ,rē,kām-bə'nā-shən ,rād-ē ,ā-shən }

recombination repair [MOL BIO] A repair mechanism involving exchange of correct for incorrect segments between two damaged deoxyribonucleic acid molecules. { rē,kām-bə'nā-shən ri ,per }

recombination velocity [NUCLEO] On a semiconductor sur-

solidated feldspathic residue that has been reworked and decomposed so slightly that upon cementation the rock resembles granite except that its grain is less even and it contains a greater percentage of quartz. Also known as reconstructed granite. { ,rē-kəm'pōzd 'gran-ət }

recomposed rock [PETR] A rock produced in place by the cementation of the fragmental products of surface weathering; for example, a recomposed granite. { ,rē-kəm'pōzd 'rāk }

recomputed point of turn [NAV] An altered dead-reckoning position of an aircraft at a turning point, determined after wind has been established by drift observations made before and after the turn. { 'rē-kəm ,pyūd-əd ,pōint əv 'tərn }

recon [GEN] The smallest deoxyribonucleic acid unit capable of recombination. { 'rē,kān }

reconditioned carrier reception [ELECTR] Method of reception in which the carrier is separated from the sidebands to eliminate amplitude variations and noise, and is then added at an increased level to the sideband, to obtain a relatively undistorted output. { ,rē'kən'dish-ənd 'kar-ē-ər ri ,sep-shən }

reconditioning [ENG] Restoration of an object to a good condition. { ,rē'kən'dish-ə-niŋ }

reconnaissance [ENG] A mission to secure data concerning the meteorological, hydrographic, or geographic characteristics of a particular area. [ORD] A mission undertaken to obtain, by visual observation or other detection methods, information about the activities and resources of an enemy or potential enemy. { ri'kān-ə'səns }

reconnaissance drone [AERO ENG] An uncrewed aircraft guided by remote control, with photographic or electronic equipment for providing information about an enemy or potential enemy. { ri'kān-ə'səns ,drōn }

reconnaissance map [MAP] A map based on the information obtained in a reconnaissance survey. { ri'kān-ə'səns ,map }

reconnaissance spacecraft [AERO ENG] A satellite put into orbit about the earth and containing electronic equipment designed to pick up and transmit back to earth information pertaining to activities such as military. { ri'kān-ə'səns 'spās ,kraft }

reconnaissance survey [ENG] A preliminary survey, usually executed rapidly and at relatively low cost, prior to mapping in detail and with greater precision. { ri'kān-ə'səns ,sə ,vā }

reconnection [ASTRON] The rejoining of solar magnetic field lines that have been severed at a neutral region. { ,rē'kō'nek-shən }

reconstituted mica [MATER] Mica sheets or shaped objects made by breaking up scrap natural mica, combining with a binder, and pressing into forms suitable for use as electrical insulating material. { rē'kān-stā ,tūd-əd 'mi'kə }

reconstitution [COMPUT SCI] The conversion of tokens back to the keywords they represent in a programming language, before generation of the output of an interpreted program. [GEOL] The formation of new chemicals, minerals, or structures under the influence of metamorphism. { rē,kān-stā'tit-shən }

reconstructed coal [MATER] Coal formed from crushed or powdered, briquetted lignite or coal, waterproofed with a coating of pitch. { ,rē-kən'strāk-təd 'kōl }

reconstructed granite See recomposed granite. { ,rē-kən'strāk-təd 'gran-ət }

reconstructed stone [LAP] A gem material made by the fusing or sintering of small particles of the genuine stone. { ,rē-kən'strāk-təd 'stōn }

reconstruction [SOLID STATE] A process in which atoms at the surface of a solid displace and form bands different from those existing in the bulk solid. { ,rē-kən'strāk-shən }

reconstructive processing [INORG CHEM] The spinning of an inorganic compound of an organic support or binder subsequently removed by oxidation or volatilization to form an in-

record changer [ENG ACOUS] A record player that changes a number of records automatically in succession. { ,rēk-əŋ-ər }

record density See bit density; character density. { ,dens-əd-ē }

recorder See recording instrument. { ri'kōrd-ər }

record gap [COMPUT SCI] An area in a storage medium, such as magnetic tape or disk, which is devoid of information; delimits records, and, on tape, allows the tape to stop between records without loss of data. Also known as record gap (IRG). { 'rek-ərd ,gap }

record head See recording head. { ri'kōrd ,hed }

recording [SCI TECH] 1. Any process for preserving sounds, data, or other information for future reference, such as disk recording, facsimile recording, magnetic tape or wire recording, and photographic recording. 2. The end product of a recording process: the recorded magnetic tape, disk, or record sheet. Also known as record. { ri'kōrd-iŋ }

recording balance [ANALY CHEM] An analytical balance equipped to record weight results by electromagnetically driven motor-driven accessories. { ri'kōrd-iŋ ,bal-əns }

recording-completing trunk [ELEC] Trunk for establishing connection from a local line to a toll operator, used for the call and for completing the toll connection. { ,kəm'plēd-iŋ ,trəŋk }

recording density [COMPUT SCI] The amount of data that can be stored in a unit length of magnetic tape, usually expressed in bits per inch or characters per inch. { ri'kōrd-iŋ ,dens-əd-ē }

recording head [ELECTR] A magnetic head used in magnetic recording. Also known as record head. [ENG ACOUS] A sound cutter. { ri'kōrd-iŋ ,hed }

recording instrument [ENG] An instrument that produces a graphic or acoustic record of one or more variables. Also known as recorder. { ri'kōrd-iŋ ,in-strə-mənt }

recording lamp [ELECTR] A lamp whose intensity is varied at an audio-frequency rate, for exposing variable sound tracks on motion picture film and for exposing variable film in photographic facsimile recording. { ri'kōrd-iŋ ,lāmp }

recording level [ELECTR] Amplifier output level adjusted to secure a satisfactory recording. { ri'kōrd-iŋ ,lev-əl }

recording noise [ELECTR] Noise that is introduced into a recording process. { ri'kōrd-iŋ ,nōiz }

recording optical tracking instrument [ENG] An instrument used for recording data in connection with magnetic tape. { ri'kōrd-iŋ ,ōpt-ə-kəl 'trak-iŋ ,in-strə-mənt }

recording rain gage [ENG] A rain gage which automatically records the amount of precipitation collected, as a function of time. Also known as pluviograph. { ri'kōrd-iŋ ,rān-geiŋ }

recording spot See picture element. { ri'kōrd-iŋ ,spōt }

recording storage tube [ELECTR] Type of cathode ray tube in which the electric equivalent of an image can be stored as electrostatic charge pattern on a storage surface; the image is visualized by a visual display, but the stored information can be read out at a later time as an electric output signal. { ri'kōrd-iŋ ,stōr-ij ,tūb }

recording thermometer See thermograph. { ,rēk-ərd ,mīm-əd-ər }

recording trunk [ELEC] Trunk extending from a local office or private branch exchange to a toll office, which is used only for communications with toll operators and for completing toll connections. { ri'kōrd-iŋ ,trəŋk }

record layout [COMPUT SCI] A form showing how information is positioned within a record, usually with information about the field. { 'rek-ərd ,lā ,aūt }

record length [COMPUT SCI] The number of characters required for all the information in a record. { 'rek-ərd ,lengθ }

record locking [COMPUT SCI] Action of a computer program that prevents data from being changed by another program.
