Subject: rosenthal futures

Hi Jim

I visited evanston and compared futures side by side with Bill Evans up there. eSpeed's front end is too slow to trade for them. They say that once the speed issue is fixed, they are happy to try it out. It was probably a third of a second too slow vs TT.

Just wanted to give you a heads up - we are not past this yet. I want to go over to Rosenthal's Chicago office this week and test it there for comparison purpose.

Thanks,
Mandy
