> ----Original Message--Gill, Bill - eSpeed > From: > Sent: Thursday, June 19, 2003 11:58 AM > To: Claus, Matt - eSpeed > Subject: Notes from Chicago trip, 6/18/03 > Futures View Comments > Futures Views must be detachable typical height for a view was 20-25 rows, maybe 6-8 inches tall by 2-3 inches wide. A trader had 2 or 3 of these open. Prices didn't move - the line dividing buy/sell moved. > Copy TT or Echo, with a few improvements, - especially a "sticky" value for size - easier way to reduce size of an existing order (with TT must bring > up new "Active Order" type window to modify) > Much better to have visual (color change) indication of day's high/low, > than to have numeric high and low figures > Direction of last trade is important - different color > Necessary to drag remaining size to a new price. > Need a cell in which to prepare next size, and some pre-valued buttons to -Clever left/right click of pre-valued size buttons to add/subtract > amounts from new default. > (If exchange feed supported it, highlight own size in stack) > Volume bars, per price > Other > New KB: change the new WI/OLD buttons to be the BID/ASK 1 thru 5 buttons > The Rosenthal techie had come up with a way for 5.3 to get just the > benchmarks, by detaching multiple grid views, shrunk down to show just the > benchmark. > Echo was cheaper than TT. > Don't want to see additional instruments because: don't trade them - takes up space - unnecessarily allows for mistakes

> Possibility of restricting/permitting ability to change GUI configuration
