

eSpeed's Copying - STATIC

None of the other changes are especially easy. Ranking from easiest to hardest:

- 1) direction-of-last-trade indicator
- 2) volume bars, per price
- 3) visual indication of high/low range by color shading
- 4) numeric keypad and cell for preparation of a "sticky" default size
- 5) move own or remaining size to a new price
- 6) move line dividing buy/sell, rather than move prices; add button to realign to center
