Table of Contents

I. Introduction....1

II. TT's claims are ineligible for patenting....1

A. The claims are directed to the abstract idea of graphing bids and offers to help a trader make an order (Step 1)....3

B. The claims do not recite an inventive concept (Step 2)....5

C. The claims preempt the abstract idea of graphing bids and offers to assist a trader in making an order....7

D. The cases cited by TT do not stand for the proposition that overcoming computer problems confers patent eligibility....8

III. TT's claims are obvious....12

A. The TSE combination teaches receiving a user's default quantity and sending the user's orders for that quantity....12

1. The Board should construe default quantity to encompass its ordinary meaning, which is taught by Togher....13

2. The claims are obvious even under TT's unreasonably narrow construction because it would have been obvious to modify the combination to use the last-entered quantity....15

B. The TSE combination teaches displaying an order icon indicating the user's order as recited in claim 5....17

C. TT's remaining arguments are not on the merits....19

1. The evidence of record shows that TSE is a prior-art publication....19

2. TD Ameritrade properly filed affidavits of accuracy supporting the TSE translation....21

3. The TSE translation is accurate and understandable....23
