

About the Matrix Window

The Matrix window provides users with an exciting new view of the market including an innovative graphical display of market depth and trade activity for a given instrument along with lightning fast order execution with its one-click trading capability. This combination allows for unprecedented market feel and efficiency for the frequent trader.

► To create a Matrix window, click the **Matrix**  icon in the **TradingApps** window. A new Matrix window is displayed.

The four basic functions of the Matrix window include:

- [Quote Bar](#) - Displays basic price quote and position information at the top of the Matrix window for the selected symbol in the Order Bar or Matrix Trade Bar.
- [Price and Volume](#) - Shows a color-coded display of the bid size, price, ask size, and volume as a visual identification of the day's trading range. contains the days trade activity at each price level. For more information, see [Matrix Trade Bar and Advanced Orders](#).
- [Order Entry](#) - Contains the Matrix Trade Order Bar which provides you with the ability to enter/cancel/change orders using a one-click method.
- [Average Price and Position P/L](#) - Provides a dynamic display of the average position price with associated P/L for open positions for the current symbol along with the symbol's VWAP (Volume Weighted Average Price) for the current session.
