>
> Futures Views must be detachable
>   - typical height for a view was 20-25 rows, maybe 6-8 inches tall by
2-3 inches wide. A trader had 2 or 3 of these open.

Prices didn't move - the line dividing buy/sell moved.

> Copy TT or Echo, with a few improvements,
>   - especially a "sticky" value for size
>   - easier way to reduce size of an existing order (with TT must bring
> up new "Active Order" type window to modify)
>
> Much better to have visual (color change) indication of day's high/low,
> than to have numeric high and low figures
>
> Direction of last trade is important - different color
>
> Necessary to drag remaining size to a new price.
>
> Need a cell in which to prepare next size, and some pre-valued buttons to
> populate it.
>   -Clever left/right click of pre-valued size buttons to add/subtract
> amounts from new default.
>
> (If exchange feed supported it, highlight own size in stack)
>
> Volume bars, per price
>
> Other
>
> New KB: change the new WI/OLD buttons to be the BID/ASK 1 thru 5 buttons
>
> The Rosenthal techie had come up with a way for 5.3 to get just the
> benchmarks, by detaching multiple grid views, shrunk down to show just the
> benchmark.
>
> Echo was cheaper than TT.
>
> Don't want to see additional instruments because:
>   - don't trade them
>   - takes up space
>   - unnecessarily allows for mistakes
>
> Possibility of restricting/permitting ability to change GUI configuration
> per user/firm.
