

eSpeed's Copying

How can we make customers leave TT and come to eSpeed? ... Customers like the "trading ticket" used on TT – **Easy Screen is in the process of duplicating TT's "trading ticket."** Why can't we or can we just use Easy Screen's? This would make the switch allot easy [sic] for traders who have been using TT for a while. **If we are visual and electronically similar to TT then all that is left is cost.**
