EDITION

Merriam-Webster, Incorporated
Springfield, Massachusetts, U.S.A.

IBG 1066

A GENUINE MERRIAM-WEBSTER

The name *Webster* alone is no guarantee of excellence. It is used by a number of publishers and may serve mainly to mislead an unwary buyer.

Merriam-Webster[™] is the name you should look for when you consider the purchase of dictionaries or other fine reference books. It carries the reputation of a company that has been publishing since 1831 and is your assurance of quality and authority.

das-tard-ly *\lē\ adj* (1542) **1**: COWARDLY **2**: characterized by underhandedness or treachery (a ~ attack) (a ~ villain) *syn* see COWARDLY — **das-tard-li-ness** *n*

dat *abbr* dative

DAT *abbr* **1** differential aptitude test **2** digital audiotape

da-ta *\dā-tā, ˈdā-also ˈdā-\ n pl but sing or pl in constr, often attrib* [L, pl. of *datum*] (1646) **1**: factual information (as measurements or statistics) used as a basis for reasoning, discussion, or calculation (the ~ is plentiful and easily available — H. A. Gleason, Jr.) (comprehensive ~ on economic growth have been published — N. H. Jacoby) **2**: information output by a sensing device or organ that includes both useful and irrelevant or redundant information and must be processed to be meaningful **3**: information in numerical form that can be digitally transmitted or processed

usage *Data* leads a life of its own quite independent of *datum*, of which it was originally the plural. It occurs in two constructions: as a plural noun (like *earnings*), taking a plural verb and plural modifiers (as *these, many, a few*) but not cardinal numbers, and serving as a referent for plural pronouns; and as an abstract mass noun (like *information*), taking a singular verb and singular modifiers (as *this, much, little*), and being referred to by a singular pronoun. Both constructions are standard. The plural construction is more common in print, perhaps because the house style of some publishers mandates it.

data bank n (1966): DATABASE

da-ta-base *\dā-tā-bās, ˈdā-also ˈdā-\ n* (ca. 1962): a usu. large collection of data organized esp. for rapid search and retrieval (as by a computer) — **database** *vt*

data mining n (1988): the practice of searching through large amounts of computerized data to find useful patterns or trends

data processing n (1954): the converting of raw data to machine-readable form and its subsequent processing (as storing, updating, re-arranging, or printing out) by a computer — **data processor** *n*

data structure n (1963): any of various methods or formats (as an array, file, or record) for organizing data in a computer
