(57) **ABSTRACT**

A registrant provides at least one registrant electronic contact, such as a telephone number, during a registration process. The registrant's information may be compared to a database of such information. The registrant is verified by establishing a connection with the registrant via the registrant contact. The verification code is communicated to the registrant, which is input into an on-line form. Notification events are established, and the registrant is notified of the occurrence of a previously established notification event by establishing a connection with the registrant via the registrant contact.
