MG Financial Group executes over one billion dollars in leveraged spot foreign exchange transactions every month. Although MG Financial Group accepts orders over the phone or via the Internet, over 90% of orders are received through the Internet. MG Financial Group's strength and focus is providing online trading services for the foreign exchange market.

Money Garden Corporation, the flagship company, was incorporated in the State of Delaware in 1992. In 1994, Money Garden Corporation began operations in New York City. Money Garden Corporation's headquarters are located at 40 Exchange Place, one block away from the New York Stock Exchange.

In April of 1997, MG Financial Group released the first version of its online trading platform. This trading platform enabled traders to view real-time quotations, execute transactions, and track open positions. Since the trading platform's introduction, important features such as real-time Java charting have been added.

Deal Station 2000™, which went live on January 30th 2000, has revolutionized forex-trading platforms. Deal Station 2000™ offers Traders the ability to deal directly with one another in addition to having access to MG's Deal Desk. The IBS (Internet Brokerage System) enables Traders to both provide market quotations to one another and deal directly on those quotations. Deal Station 2000™ also takes advantage of the latest Java "Push" Technology, which immediately "pushes" new information to your computer, automatically updating your screens. The implementation of Java technology enhances overall system performance, which will result in improved speed and extremely fast execution time.

MG Financial Group began a news/research division in the middle of 1997 called ICT NEWS. This division was formed to provide MG Financial Group's clients with accurate and up-to-date information on the foreign exchange market. Members of the news/research division are frequently asked to contribute expert commentary to

major media concerns, such as [Investors Business Daily](#) and Reuters TV.

In 1998, Money Garden Corporation became the first foreign exchange market maker to obtain fidelity bond insurance. The insurance, issued through the subsidiary of a NYSE company, protects the assets of Money Garden Corporation from fraud and embezzlement by members of the firm. The amount of protection exceeds the current amount of assets.

MG Financial Group's greatest asset is its people. The firm has recruited individuals from all nationalities and backgrounds in order to obtain an extremely talented and competent staff.
