You have contacted the U.S. Patent Commission which is Division of The Intellectual Property Center to discuss your new product idea/concept titled as:

Built In Truck Ramp- (For Pick-up trucks)

It is mutually agreed between inventor and the Intellectual Property Center that upon inventor disclosing the detail of his/her new product that:

1. Witness shall not use or disclose or any variation thereof to any other person, organization, or corporation without your written consent.
2. Witness agrees to acknowledge inventor as the claimed originator of this invention.

## Testimonial Of Invention

### Title Of Your Product Concept:

No title as of yet - Its a built in truck ramp

### Describe The Idea:

A ramp that comes standard issue in most pick-up trucks. A ramp located in the bed of a pick-up, a ramp that slides out over your tailgate for easy loading and off loading of machines. (quads, dirt bikes, golf carts, riding mowers)

### Describe How It Works:

Its a ramp that sits in the bed of your pickup truck. When not in use, it is locked into place. When you need it, it simply slides out for loading or off loading of heavy machinery.

### What makes this idea unique?

This would be better than having to purchase ramps ~~separately~~ separately, and remembering to have them in your truck when you need them.

Who would use this invention?

All outdoorsmen and women. Anyone who hunts, fishes, mows lawns, or just loves to spend time outside (camping) with quads or even dirt bikes.

Inventor Signature: Neil J. H. H.

U.S. Patent Commission

Design 1:

Design 2: Same basic concept, except I've changed the design of the tailgate to better the function of the ramp.

tailgate doors swing open left/right, not down.

back of truck up

ramp system pulls out for use, not having to bend over regular tailgate.

The ramp system will be strong and wide enough to use for quads, dirtbikes, golf carts, riding mowers and even snow sleds. I apologize for any awkwardness I'm not very skilled in that department. Any questions, please contact me.

Thank you
