FINGERPRINT SECURITY: ONE-OF-A-KIND

This smartphone is smart about security. Fingerprint recognition technology means only you can access what's on your phone. Faster, enhanced security beats passwords or PIN locks any day.

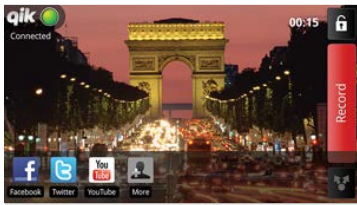

MEGA MEMORY: STORE MORE

With up to 48GB of memory (16GB on board and an optional 32GB micro SD card) you won't have to choose. You can store even more songs, photos, and files—even full-length movies.

DUAL CORES: COMPUTER-LIKE SPEED

Dual-core technology is fast. It's like a computer processor for your phone. Email, play music, browse the web, and access documents all at once. It's multi-tasking in the truest sense.

DISPLAY CLARITY: BETTER THAN 20/20

Get ready to be blown away. The world's first qHD smartphone display boasts super-crisp games, clearer words, more vibrant pictures, as well as movies and TV shows that pop.

VIDEO CHAT: SEE EYE-TO-EYE

A front-facing web cam and downloadable video chatting apps put you face-to-face with your callers. Or, switch to the 5MP rear-facing camera for a little show-and-tell.

HD VIDEOS: WATCH WITH AWE

That's right. Now you can watch your HD videos on a big screen. An HDMI video output makes the movies you take, or own, available on your HD TV or computer. That's truly mobile content.
