Interne

Simtel MSDOS CDRROM

The Simtel Collection is accessible at the Internet address <ftp.cdrom.com>

The archive contains a colossal amount of free public domain and shareware software for the CP/M, PCDOS, MSDOS, Macintosh, and UNIX operating systems, and for the DoD standard programming language Ada. The software is updated regularly, making Simtel one of the most current and comprehensive sources of software. Beginning in January 1992, Walnut Creek CDRROM began providing several of the popular Simtel archives on CDRROM. The disc contains the entire Simtel MSDOS Archive.

Type **GO** to start.

Thanks to Keith Petersen for helping make this disc possible.
Cover design by Jerome Engelberts.

Although you own this disc, you do not own the programs recorded on it. Many programs on this disc are shareware. You are free to try each program for a limited time. If you are satisfied and want to continue to use the program, you are expected to register the program. You register by sending a specified amount on money directly to the author of the program. Often the author will send you the most up to date version of the program and a printed manual. Please check the individual files for specific information.

IMPORTANT FILES & DIRECTORIES

<code>go.bat</code>	Run this program to start.
<code>dirs.txt</code>	List of directories, with brief descriptions.
<code>readme.txt</code>	Important information, read this first.
<code>index.txt</code>	A list of all the files in the archive.
<code>index.z</code>	Compressed copy of <code>index.txt</code> .
<code>index.zip</code>	Zipped copy of <code>index.txt</code> .
<code>unzip.exe</code>	Program for unzipping files named <code>*.zip</code> .
<code>view.exe</code>	Program to view text files.
<code>msdos\</code>	Directory containing the Simtel MSDOS Archive.
<code>_bbs\</code>	Directory containing BBS .dir files and setup inform

Simtel MSDOS CDRROM

October 1993

The entire Internet Simtel MSDOS Archive, this CDRROM contains 9000 files in 650 megabytes. The programs cover almost every use for a computer, from word processing to databases to DOS utilities.

This CDRROM contains:

- Technical documents, utilities and programming tools, source code, several complete BBS programs, and doors fossils and utilities for BBS's.
- Tools of APL, ADA, assembly, BASIC, C C++, Clipper, COBOL, DBase, Forth, Fortran, Lotus 1-2-3, Modula-2, Pascal, Perl, prolog, smalltalk, xlistp, etc.
- Several programmer's editors.
- Communications utilities including PC/IP, kermite, uuucp, and zmodem, along with several full featured comm packages.
- Many versions of compression and library programs, an assortment of utilities for controlling postscript, dot matrix, laser and other printers.
- A large assortment of ham radio programs.
- Much, much more.

The source code on this disc is a great reference; the utilities will speed development time. This disc is an indispensable resource for any DOS user. The disc includes support for six popular BBS packages. The disc is thoroughly indexed and includes an easy to use file browser so it is simple to locate files by name or subject.
