[57] ABSTRACT

[21] Appl. No.: **981,861**

A projection color liquid crystal display (LCD) system uses a large reflecting liquid crystal (LC) panel as a screen. The system includes three unicolor light sources for emitting lights of the colors red, green and blue, respectively, the light sources being disposed remote from the screen; three light shutters for permitting the red, green, and blue light beams to successively and periodically pass to the screen; and three diffusing lenses for diffusing the respective beam which is passing to the screen. Each respective light shutter permits the passage of a corresponding light beam. The color driving signal corresponding to the light beam from the image controlling circuit is applied to the driver to drive the LC panel. As a result, the red, green and blue light beams are successively reflected from the reflection type LC panel according to the color driving signal. Since the reflecting frequency of successive three color light beams is under 1/30 of a sec and, a person who is looking at the front side of the screen recognizes successive three color light beams as the composite color screen.

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
