**PATENT OWNER'S NOTICE FO SUPPLEMENTAL EVIDENCE**

Patent Owner submits that Petitioner's objection to deposition evidence Exhibit YRD-2007 filed on November 14, 2013, under § 42.64(b)(1), is improper. Specifically, objections to deposition evidence are governed by § 42.64(a), entitled "Deposition evidence" which states that "[a]n objection to the admissibility of deposition evidence must be made during the deposition." Here, the Petitioner did not object to the admissibility of deposition evidence Exhibit YRD-2007 during the deposition. (Dr. Darrell Deposition at 30-32). Thus, Patent Owner submits that Petitioner has waived any objection to the admissibility of deposition evidence Exhibit YRD-2007.

Patent Owner notes that although deposition evidence Exhibit YRD-2007 has not yet been submitted to the Board, it will be submitted by the court reporter in due course. Patent Owner further submits that deposition evidence Exhibit YRD-2007 facilitated the deposition of Dr. Trevor Darrell by having a specific example with which to discuss stereoscopic imaging in general, and therefore is relevant. Further still, Patent Owner submits that Petitioner's own expert witness, Dr. Darrell, authenticated Exhibit YRD-2007 as a printed reproduction of a stereo pair, displayed in two colors, which when viewed by red/cyan glasses provides a perception of depth. (Dr. Darrell Deposition at 31:7-32:12). Thus, Petitioner's

objection to the relevance and authenticity of deposition evidence Exhibit YRD-2007 is without merit.

If further discussion is needed, Patent Owner requests a telephone conference between the parties and the Board.

Dated: November 20, 2013
