

Challenge opponents world-wide! Solitaire.com gives you an exciting new game to play DOUBLE SOLITAIRE across the Internet. Double Solitaire is similar to regular Solitaire except there are two players. You play on your four piles of played cards AND also those of your opponent. Whoever gets there first gets the point. The one with the most points wins!

Our plugin for Netscape 3/4 and Internet Explorer 3/4 lets you play directly from Windows95 or WindowsNT. And the best news . . . *it's free.* Why wait.

*If you need the Double Solitaire Plugin, it's only about 200K and is simple to download and install (a couple of minutes on a 28.8 modem).*

To play, you must have first downloaded and installed Double Solitaire. Click the Download button to the left if you have not yet downloaded the software.

Once you have installed the plugin, you should be ready to go. Click the play button above.

If you have any problems, questions or suggestions, please let us know:
