DETAILED ACTION

Election/Restrictions

1. Applicant's election of Species I in the reply filed on 22 October 2010 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Information Disclosure Statement

2. The information disclosure statement filed 20 February 2009 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. Although the patents listed in the "US patent documents" section were considered, items listed in the "Foreign Patent Documents" section and the "Other Documents" section of PTO-1449 have been lined through and not considered, as they were not supplied with the instant application or the parent application.

Priority

3. Applicant's claim for the benefit of a prior-filed application under 35 U.S.C. 119(e) or under 35 U.S.C. 120, 121, or 365(c) is acknowledged. Applicant has not complied with one or more conditions for receiving the benefit of an earlier filing date under 35 U.S.C. 119(e) or 35 U.S.C. 120 as follows:

Art Unit: 2872

Applicant states that this application is a continuation or divisional application of the prior-filed application. A continuation or divisional application cannot include new matter. Applicant is required to change the relationship (continuation or divisional application) to continuation-in-part because this application contains new matter in the claims that was not disclosed in the prior-filed application: For example, the parent application does not include any lens diameters much less maximum diameters of different lens units. It is noted that drawings are not to scale and cannot be considered support for these limitations.

Drawings

4. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, a first lens unit, a second lens unit, a third lens unit and a fourth lens unit, an effective imaging area of a predetermined shape not including the optical system, intermediate image, an optically conjugate point of the aperture stop, and wherein the two mirrors away from an optically conjugate point of the aperture stop must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the
