(57) **ABSTRACT**

A method and apparatus for providing domain name services includes a multi-threaded name server which concurrently handles multiple domain name resolution requests and is particularly well suited for an Internet host system controlling information relating to a very large number of domain names. A database coherency thread continuously refreshes a host name cache that is utilized by the multi-threaded name server. The multi-threaded name server may comprise a request dispatcher thread capable of spawning multiple child threads, resulting in a multi-threaded, non-blocking name server. One or more additional network services are also provided by the system, preferably through a common, centralized database. For example, in one embodiment, electronic message forwarding services are provided. In another embodiment, web services are provided wherein hypertext markup language (HTML) pages are dynamically generated from data in the database corresponding to the requested host name.

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
