

**Toyota Motor Corporation, Petitioner**  
**v.**  
**American Vehicular Sciences (“AVS”), Patent Owner**

Before Jameson Lee, Trevor M. Jefferson, and Barbara A.  
Parvis, *Administrative Patent Judges*

No. IPR2013-00424  
Patent No. 5,845,000

Thomas J. Wimbiscus, Lead Counsel  
Scott P. McBride, Backup Counsel  
Christopher M. Scharff, Backup Counsel

# Grounds for Institution

## Trial Instituted on Claims:

10, 11, 16, 17, 19, 20, 23

- Claims 10, 11, 16, 17, 19, 20, 23 for anticipation by **Lemelson**
- Claims 10, 11, 19, 23 for obviousness by **Lemelson** and **Asayama**
- Claims 16, 17, 20 for obviousness by **Yanagawa** and **Lemelson**

## Grounds for Institution by Type

- All reviewed claims for anticipation by **Lemelson**
  - All reviewed claims require “**generating a pattern recognition algorithm**” “**pattern recognition algorithm generated**” “**from data of possible exterior objects and patterns of received electromagnetic illumination from the possible exterior objects**”
- Claims 10, 11, 19, 23 for obviousness by **Lemelson** and **Asayama**
  - Claims require “**transmitting electromagnetic waves**”
- Claims 16, 17, 20 for obviousness by **Lemelson** and **Asayama**
  - Claims require “**output means . . . for dimming the headlights in said veh**”

## Independent Claim 10

10. In a motor vehicle having an interior and an exterior, a monitoring system for monitoring at least one object exterior to said vehicle comprising: a) transmitter means for transmitting electromagnetic waves to illuminate the at least one exterior object;

b) reception means for receiving reflected electromagnetic illumination from the at least one exterior object;

c) processor means coupled to said reception means for processing said received illumination and creating an electronic signal characteristic of said exterior object based thereon;

d) categorization means coupled to said processor means for categorizing said electronic signal to identify said exterior object, said categorization means comprising trained pattern recognition means for processing said electronic signal based on said received illumination from said exterior object to provide an identification of said exterior object based thereon, said pattern recognition means being structured and arranged to apply a pattern recognition algorithm generated from data of possible exterior objects and patterns of received electromagnetic illumination from the possible exterior objects; and

e) output means coupled to said categorization means for affecting another system in the vehicle in response to the identification of said exterior object

## Independent Claim 16

16. In a motor vehicle having an interior and an exterior, an automatic headlight dimming system comprising:

- a) reception means for receiving electromagnetic radiation from the exterior of the vehicle;
- b) processor means coupled to said reception means for processing the received radiation and creating an electronic signal characteristic of the received radiation;
- c) categorization means coupled to said processor means for categorizing said electronic signal to identify a source of the radiation, said categorization means comprising training data and pattern recognition means for processing said electronic signal based on said received radiation to provide an identification of the source of the radiation based thereon, said pattern recognition means being structured and arranged to apply a pattern recognition algorithm generated from data of possible sources of radiation including lights of vehicles and patterns of received radiation from the possible sources; and
- d) output means coupled to said categorization means for dimming the headlights in the vehicle in response to the identification of the source of the radiation.

# Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

## Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

## Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

## Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

## API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

## LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

## FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

## E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
