

UNITED STATES PATENT AND TRADEMARK OFFICE

BEFORE THE PATENT TRIAL AND APPEAL BOARD

APOTEX CORP.,
Petitioner

v.

ALCON RESEARCH, LTD.,
Patent Owner.

Case IPR2013-00428
U.S. Patent No. 8,268,299 B2

DECLARATION OF RICHARD K. PARRISH, II, M.D.

I, Richard K. Parrish, II, M.D., hereby declare as follows:

I. INTRODUCTION

1. I am over the age of eighteen and otherwise competent to make this declaration.

2. I have been retained as an expert witness for Alcon Research, Ltd. (“Alcon”) to provide my professional opinion on certain issues relating to the care and treatment of patients with glaucoma and elevated intraocular pressure.

II. BACKGROUND AND QUALIFICATIONS

3. I am the Director of the Glaucoma Service at the Bascom Palmer Eye Institute and a Professor in the Department of Ophthalmology at the University of Miami Miller School of Medicine. In that role, I oversee the coordination of all glaucoma care and treatment at Bascom Palmer. I directly supervise seven faculty members and four glaucoma fellows, all of whom focus their medical practices on teaching and patient care related to glaucoma. Collectively, in the past thirteen months, we have provided glaucoma care in more than 26,000 outpatient visits and 1,400 surgical procedures.

4. I maintain an active clinical practice involving all aspects of the treatment of glaucoma, as I have done for more than 30 years. In fact, my clinical practice today is limited almost exclusively to the treatment and management of care of patients with glaucoma. Because of the nature of my practice, I often see

patients who present with some of the most complicated and advanced cases of glaucoma. In the past thirteen months alone, I have seen more than 4,000 patients and performed more than 200 surgical procedures as part of my glaucoma practice.

5. I have been board certified in ophthalmology by the American Board of Ophthalmology for more than 30 years. I have served as an Associate Examiner for the American Board of Ophthalmology in three different years, and been invited to serve as an examiner on numerous other occasions.

6. As the Director of the Glaucoma Service at Bascom Palmer, I am also responsible for all of that institution's research and educational activities with respect to glaucoma. As part of these responsibilities, I oversee the training and mentorship of our glaucoma fellows. These fellows are physicians who have been selected for a one-year fellowship to immerse themselves in both the clinical aspects of glaucoma treatment as well as clinical and laboratory research activities related to glaucoma. Our fellows have gone on to become leaders in the field of glaucoma research and care, including the Chairs of the Department of Ophthalmology at the Medical College of Wisconsin, the University of North Carolina School of Medicine, Case Western Reserve University, and Yale University School of Medicine. I have also mentored multiple doctors who have gone on to assume senior glaucoma leadership positions within the U.S. military, including the former heads of glaucoma at some of the military's largest patient

care institutions. Dozens of fellows whom I have mentored over the years are now faculty members and clinicians with a practice specialty in glaucoma at leading academic institutions.

7. Aside from, and in addition to, my teaching responsibilities at the University of Miami Miller School of Medicine, I have been teaching courses and continuing medical education related to glaucoma to practicing ophthalmologists for more than three decades. As one example, for the past ten years, I have organized and directed the annual Miami Mid-Winter Symposium on Glaucoma. These symposia have been attended by more than 1,000 leading ophthalmologists from all over the United States. I have presented frequently at these conferences over the years on multiple glaucoma-related topics. I have also served as a visiting professor at more than 30 different institutions around the world.

8. I am an active attendee and participant in professional conferences around the world that center on glaucoma and its treatment. I recently attended the Seventh International Congress of Glaucoma Surgery in Singapore, for example, where I lectured as an invited presenter. I have delivered more than 65 named or invited lectures around the world, almost all of which dealt with some aspect of the treatment of glaucoma, including the John Lynn Lecture at the University of Texas Southwestern in Dallas, and similar lectures at McGill University in Montreal and

at the University of Louisville. I typically deliver about five named or invited lectures each year.

9. I presently hold, or have recently held, senior leadership positions in a number of professional organizations that relate to the research and treatment of glaucoma. For example, I am a member of the American Glaucoma Society and have served as the Society's counselor and representative to the American Academy of Ophthalmology. I am also a member of the American Ophthalmologic Society, and last year, served as the organization's President. In past years, I have also served on the Board of Directors of the Glaucoma Research Society, an international organization dedicated to glaucoma research and comprised of physicians and researchers accepted for membership by the Society based on a written thesis. I am also a member of the American Academy of Ophthalmology, the American Medical Association, and numerous other professional organizations.

10. I am an editor or reviewer for more than twenty different medical publications, including the highly-respected *Archives of Ophthalmology*, *Investigative Ophthalmology and Visual Science*, and the *American Journal of Ophthalmology*. I have served in a variety of leadership and editorial positions related to these publications, including current service as an executive editor for

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
