ABSTRACT [57]

A method for performing remote diagnostics on a personal computer system in which the user calls a help desk representative who creates a computerized case file which includes modem telephone numbers, call and computer identification information. The representative also selects specific diagnostic tests, resident on the user's diagnostic disk, to be run on the user's computer. The representative creates a batch job which causes a computer to connect to the user's computer via modem and instructs the user's computer to perform the selected tests. The telephone connection is then broken. The user's computer reconnects with the help desk computer on completion of the tests and reports the result to the help desk representative. The representative then reviews the files and calls the user with recommendations. Certain necessary files can then be downloaded using a similar procedure.

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time** alerts and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
