DECISION
Petitioner's Motions to Correct
37 C.F.R. § 42.7

¹ Case IPR2013-00469 has been joined with Case IPR2013-00468. This Decision addresses issues pertaining to all three cases. Therefore, we exercise our discretion to issue one Decision to be filed in each case. The parties are not authorized to use this style heading for any subsequent papers.

IPR2013-00449 (Patent 7,840,420 B2), IPR2013-00451
(Patent 7,587,469 B2), IPR2013-00468 (Patent 7,516,192 B2)

Petitioner filed an unopposed motion to correct certain filings in each of the instant proceedings. Under the circumstances, we are persuaded that the errors were clerical in nature and that it would be appropriate to allow their correction. The motions are granted.

In Case IPR2013-00449, Petitioner filed, with its Reply on June 10, 2014, a copy of U.S. Patent No. 5,827,180 as Exhibit 1040. Petitioner states that the exhibit is duplicative of Exhibit 1006, and requests that the duplicate copy filed as Exhibit 1040 be expunged. *See* IPR2013-00449, Paper 48.

In Case IPR2013-00451, Petitioner filed, with its Reply on June 10, 2014, a declaration from Robert T. Stone, Ph.D., as Exhibit 1022. Petitioner states that the declaration contains an incorrect citation, and requests that it be replaced with a corrected version also filed as Exhibit 1022 on July 15, 2014. *See* IPR2013-00451, Paper 48.

In Case IPR2013-00468, Petitioner states that its Reply (Paper 46) contains an incorrect citation, and requests that it be replaced with a corrected version (Paper 52). *See* IPR2013-00468, Paper 51.

In consideration of the foregoing, it is hereby:

ORDERED that Petitioner's motions to correct are *granted*;

FURTHER ORDERED that Exhibit 1040 in Case IPR2013-00449 is expunged from the record of the proceeding;

FURTHER ORDERED that the corrected version of Exhibit 1022 in Case IPR2013-00451, filed on July 15, 2014, is entered, and the original version, filed on June 10, 2014, is expunged from the record of the proceeding; and

FURTHER ORDERED that Petitioner's corrected Reply in Case IPR2013-00468 (Paper 52), filed on July 15, 2014, is entered, and

IPR2013-00449 (Patent 7,840,420 B2), IPR2013-00451
(Patent 7,587,469 B2), IPR2013-00468 (Patent 7,516,192 B2)

Petitioner's original Reply (Paper 46), filed on June 10, 2014, is expunged
from the record of the proceeding.
