Detailed Action

1.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1, 3 and 7 are rejected under 35 U.S.C. 102(e) as being anticipated by Nusbickel.

Application/Control Number: 09/365,365 Art Unit: 2624

Page 3

With respect to claim 1, Nusbickel teaches a printing and publishing system which generates a printing plate-ready file from data provided remotely in real time using a communication network, the printing and publishing system comprising: an end user facility (109) coupled to a communication network 107, the end user facility providing page building operations (from Web Browser 111 according to col. 4, lines 16-46), the page building operations including the design and construction of pages from images, text, and data available via the communication network, see screen 200 in figure 2. Nusbickel teaches a central service facility (101) coupled to said communication network 107, the central service facility providing storage, file processing, remote access (communication over the Internet), content management operations (WEB Browser applications); the file processing operations including generating a plate-ready file from pages designed at said end user facility (i.e., multimedia file) said plate-ready file having a file format capable of high resolution and ready for creation of a printing plate and a printing company facility (701 indirectly connected to said communication network), the printing company facility providing printing operations (fax operations), the printing operations including printing from the printing plate (file designated by the Browser) from said ready file (via format 713)

With respect to claim 3, Nusbickel teaches wherein said file processing operations further comprise generating a Postscript file (GIFF) for operating over the communication network 107.

Application/Control Number: 09/365,365 Art Unit: 2624 Page 4

With respect to claim 7, Nusbickel teaches wherein the central service facility further comprises a communication routing device coupling the central service facility to the communication network, a server which performs content management operations, and storage devices which contain electronic files. See col. 5, lines 50-60 and col. 4, lines 7-15.

2.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 5, 8 and 9 rejected under 35 U.S.C. 103(a) as being unpatentable over Nusbickel in view of the Well Known Prior Art 2144.03 (official notice).

Nusbickel teaches all of the subject matter upon which the claims depend except for the specific language that the communication network has to be a WAN, switched network or an ATM type network. Nusbickel clearly shows a network 107 which happens to be an Internet network. However, it is well known to one of ordinary skill

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time** alerts and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
