	in Communications, Vol. 12, No. 9, October 1992 ("Raychauduri")
Exhibit 2024	Wagner et al., U.S. Pat. No. 5,761,292, entitled "Simultaneous Transfer of Control Information with Voice and Data Over a Public Switched Telephone Network Line" ("Wagner")

I. INTRODUCTION

In the event that the challenged claims are found unpatentable, Patent Owner Telefonaktiebolaget L.M. Ericsson (“Ericsson”) hereby moves pursuant to the Board’s March 10, 2014 Order, Paper No. 27, and 37 C.F.R. § 42.121 to cancel claims 1-6 of U.S. Pat. No. 6,466,568 (“the ’568 Patent”) and submit proposed substitute claims 8-13 in their place.

II. LISTING OF PROPOSED SUBSTITUTE CLAIMS

The following claim listing identifies the changes to the ’568 Patent so that the Board can identify the new limitations and deletions of limitations. *See* 37 C.F.R. § 42.121(b); *Nichia Corp. v. Emcore Corp.*, IPR2012-00005, Paper 68 at *50 (PTAB Feb. 11, 2014). Petitioner has used underlining to indicate text inserted in the corresponding original claim, as suggested by the Board. *Toyota Motor Corp. v. Am. Vehicular Sciences LLC*, IPR2013-00419, Paper 32 at *2 (PTAB March 7, 2014).

Proposed Claims

8. (Proposed Substitute for Original Claim 1) A communication station comprising: a processor for arranging information for transmission including providing at least one first field in which payload information is disposed and providing at least one second field, separate from said first field, which includes a service type identifier which identifies transmission characteristics of a service and

a type of payload information provided in said at least one first field; and a transmitter for transmitting information received from said processor including said at least one first field and said at least one second field.

9. (Proposed Substitute for Original Claim 2) The communication station of claim 48, wherein said processor is also for changing said type of payload information from a first type to a second type during a connection involving said communication station and adjusting a value of said service type identifier to correspond to the second type of information.

10. (Proposed Substitute for Original Claim 3) The communication station of claim 29, wherein said first type of information is one of video, voice and data and said second type of information is different one of video, voice and data.

11. (Proposed Substitute for Original Claim 4) The communication station of claim 48, wherein said information is multimedia information.

12. (Proposed Substitute for Original Claim 5) The communication station of claim 48, wherein said communication station is a base station.

13. (Proposed Substitute for Original Claim 6) The communication station of claim 48, wherein said communication station is a mobile station.

III. STATEMENT OF SUBSTITUTION CONTINGENCIES

Under 37 C.F.R. § 42.121(a)(3), this Motion includes one proposed substitute claim for each challenged claim to be replaced. Under 37 C.F.R. §

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
