

PATENT

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Applicant: Beaudoin et al.

Serial No.: 09/830,146

Group Art Unit: 1651

Filed: July 25, 2001

Examiner: Witz, Jean C.

Title: METHOD OF EXTRACTING LIPIDS FROM MARINE AND AQUATIC ANIMAL
TISSUES

AMENDMENT

CERTIFICATE UNDER 37 CFR 1.8(a)
I hereby certify that this correspondence is being
deposited with the U.S. Postal Service as First Class mail
in an envelope addressed to Commissioner for Patents, P.O.
Box 1450, Alexandria, VA 22313-1459

on 8-25-03

Am 2 Rev Reg. No. 40,764

Mail Stop Fee Amendment
Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1459

FAX RECEIVED

OCT 23 2003

PETITIONS OFFICE

Dear Sirs:

This amendment is in response to the Office Action dated February 25, 2003.

Amendments to the claims begin on page 2 of this paper.

Remarks/arguments begin on page 8 of this paper.

{WP146887;1}

Appln. No. 09/830,146
Amendment
Response to Office Action dated 02/25/2003

Docket No. 789-47

AMENDMENTS TO THE CLAIMS

1-51. (Cancelled)

52. (New) A method for extracting total lipid fractions from marine and aquatic animal material, said method comprising the steps of:

- (a) placing marine and aquatic animal material in a ketone solvent to achieve extraction of the soluble lipid fraction from said marine and aquatic animal material;
- (b) separating the liquid and solid contents;
- (c) recovering a first total lipid rich fraction from the liquid contents of b) by evaporation of the solvent present in the liquid contents;
- (d) placing said solid contents in an organic solvent selected from the group of solvents consisting of alcohol and esters of acetic acid to achieve extraction of the remaining soluble total lipid fraction from said marine and aquatic animal material;
- (e) separating the liquid and solid contents;
- (f) recovering a second total lipid rich fraction by evaporation of the solvent from the liquid contents of e); and
- (g) recovering the solid contents.

53. (New) A method as in claim 52, wherein steps (b) and (d) are conducted under inert gas atmosphere.

54. (New) A method as in claim 52, wherein steps (b) and (e) are effected by techniques selected from the group consisting of filtration, centrifugation and sedimentation.

Appln. No. 09/830,146
Amendment
Response to Office Action dated 02/25/2003

Docket No. 789-47

55. (New) A method as in claim 52, wherein steps (c) and (f) are effected by techniques selected from the group consisting of vacuum evaporation, flash evaporation and spray drying.

56. (New) A method as in claim 52, wherein after step (b) and before step (c), the method additionally comprises the intervening step of washing the solid contents with the solvent and adding the resulting washing solution to the liquid contents of step (b).

57. (New) A method as in claim 52, wherein after step (e) and before step (f), the method additionally comprises the intervening step of washing the solid contents with the organic solvent selected in step (d).

58. (New) A method as in claim 52, wherein prior to step (a) the marine and aquatic animal material is finely divided.

59. (New) A method as in claim 52, wherein steps (a) and (b) are conducted at solvent temperatures of not more than about 5°C.

60. (New) A method as in claim 52, wherein said marine and aquatic animal is zooplankton.

61. (New) A method as in claim 60, wherein said zooplankton is selected from krill and *Calanus*.

62. (New) A method as in claim 52, wherein said marine and aquatic animal is fish.

63. (New) A method for extracting an astaxanthin-and-canthaxantin-containing total lipid fraction from a marine and aquatic animal material selected from zooplankton and fish, said method comprising the steps of:

Appln. No. 09/830,146
Amendment
Response to Office Action dated 02/25/2003

Docket No. 789-47

- (a) placing said animal material in a ketone solvent to achieve an extraction of the soluble lipid fraction from said marine and aquatic animal material;
- (b) separating the liquid and solid contents; and
- (c) recovering a lipid rich fraction from the liquid contents by evaporation of the solvent present in the liquid contents,

whereby an astaxanthin-and-canthaxantin-containing total lipid fraction is obtained.

64. (New) A method for extracting a total lipid fraction from a marine and aquatic animal material selected from zooplankton and fish, said method comprising the steps of:

- (a) placing said animal material in a solvent mixture comprising acetone and ethanol to achieve an extraction of the soluble lipid fraction from said marine and aquatic animal material;
- (b) separating the liquid and solid contents; and
- (c) recovering a lipid rich fraction from the liquid contents by evaporation of the solvents present in the liquid contents,

whereby a total lipid fraction is obtained.

65. (New) A method as in claim 63, wherein the animal material is selected from krill and *Calanus*.

66. (New) A method as in any one of claim 63, wherein during step (a), the animal material is homogenized.

67. (New) A method as in claim 63, wherein steps (b) and (d) are conducted under inert gas atmosphere.

68. (New) A method as in claim 63, wherein step (b) is effected by a technique selected from the group consisting of filtration, centrifugation and sedimentation.

Appln. No. 09/830,146
Amendment
Response to Office Action dated 02/25/2003

Docket No. 789-47

69. (New) A method as in claim 63, wherein step (c) is effected by a technique selected from the group consisting of vacuum evaporation, flash evaporation and spray drying.

70. (New) A method as in claim 63, wherein after step (b) and before step (c), the method additionally comprises a step of washing said solid contents with solvent and adding the resulting washing solution to the liquid contents of step (b).

71. (New) A method as in claim 63, wherein prior to step (a) the marine and aquatic animal material is finely divided.

72. (New) A method as in claim 63, wherein steps (a) and (b) are conducted at solvent temperatures of about 5°C or less.

73. (New) A method of lipid extraction as in claim 52, wherein the solid contents of step b) is recovered and consists of a dehydrated residue containing active enzymes.

74. (New) A method of lipid extraction as in claim 63, wherein the solid contents of step b) is recovered and consists of a dehydrated residue containing active enzymes.

75. (New) A method for extracting total lipid fractions from marine and aquatic animal material, said method comprising the steps of:

- (a) placing marine and aquatic animal material in a ketone solvent to achieve extraction of the soluble total lipid fraction from said marine and aquatic animal material;
- (b) separating the liquid and solid contents;
- (c) recovering a first total lipid-rich fraction from the liquid contents of b) by evaporation of the solvent present in the liquid contents;
- (d) placing said solid contents in an organic solvent selected from the group of solvents consisting of alcohol and esters of acetic acid to achieve extraction

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
