

10 March 2000

Dear Dr. Norred,

You have performed very well during your echo rotation on block 9 of this year. You especially have honed your TEE technical skills as well as your interpretive skills for stress and dobutamine stress echo. You have been introduced to some newer concepts such as diastolic functional evaluation and seem to have grasped them well. You have a knack for creative ideas and thoughts that with some continued work show possible interesting potential.. It has been a pleasure working with you and I feel your skills are developing well especially for your year level..

Darla B Hess, MD
