BEFORE THE PATENT TRIAL AND APPEAL BOARD

RPX CORP.,
Petitioner,

v.

VIRNETX INC.,
Patent Owner.

Case IPR2014-00174
Patent 7,921,211

Before MICHAEL P. TIERNEY, KARL D. EASTHOM, and STEPHEN C. SIU,
Administrative Patent Judges.

EASTHOM, *Administrative Patent Judge.*

DECISION
Motion to Expunge
37 C.F.R. § 42.56

INTRODUCTION

On July 14, 2014, Petitioner, RPX Corp. (“RPX”), filed a Motion to Expunge (“Motion”), requesting two alternatives: 1) to expunge from the record all documents that have been filed under seal in this proceeding, or 2) to expunge, in their entirety, Exhibits 2046, 2047, 2051, and 2058, and to redact certain information contained in Papers 36, 47, and 50, and in Exhibits 2045, 2048–2050, 2052–2057, and 2060. Paper 55.

With its Motion, as part of the second alternative, Petitioner submitted redacted versions of Paper 36 (Paper 56), Paper 47 (Paper 57) and Paper 50 (Paper 58) and Exhibits 2045, 2048–2050, 2052–2057, and 2060. In addition to the newly redacted version of Paper 47 (Paper 57) and of Paper 50 (Paper 58), the record includes a previously redacted version of Paper 47 (Paper 48) and of Paper 50 (Paper 53). The record also includes previously redacted and sealed versions of many other exhibits and papers.

In our Decision Denying Institution (Paper 50), we determined that Apple Inc. (“Apple”) was an unnamed real-party-in interest in this proceeding. Apple, from whom VirnetX sought and obtained discovery, has participated throughout the proceeding with the named parties in determining what information to seal and redact. In its Motion, RPX outlines the positions by Apple and VirnetX concerning its opposition against, or agreement with, RPX’s Motion. (The Motion indicates that Apple and VirnetX communicated their respective positions to RPX, rather than filing papers.)

Under second alternative, the public will retain much more information than it would retain under the first alternative. Petitioner’s Motion under the *first alternative* is *denied* and under the *second alternative* is *granted*.

PUBLIC POLICY

A strong public policy exists for making all information filed in a quasi-judicial administrative proceeding open to the public, especially in an *inter partes* review, which determines the patentability of claims in an issued patent and therefore affects the rights of the public.

Only “confidential information” is protected from disclosure. 35 U.S.C. § 316(a)(7)(“The Director shall prescribe regulations . . . providing for protective orders governing the exchange and submission of confidential information”). The Office Patent Trial Practice Guide, 77 Fed. Reg. 48,756, 48,760 (Aug. 14, 2012) (“TPG”), provides guidance:

The rules aim to strike a balance between the public’s interest in maintaining a complete and understandable file history and the parties’ interest in protecting truly sensitive information.

* * *

Confidential Information: The rules identify confidential information in a manner consistent with Federal Rule of Civil Procedure 26(c)(1)(G), which provides for protective orders for trade secret or other confidential research, development, or commercial information. § 42.54.

Granting a motion to seal “confidential information” requires a showing of “good cause” 37 C.F.R. § 42.54 during a proceeding. A parallel rule, 37 C.F.R. § 42.56, implies the same standard applies to a motion to expunge “confidential information” “[a]fter denial of a petition to institute a trial or after final judgment in a trial.” The movant generally has the burden of proof in showing entitlement to the requested relief. 37 C.F.R. § 42.20(c). In this case, RPX must show that any information sought to be expunged constitutes confidential information, and that RPX’s interest in expunging it outweighs the public’s interest in maintaining a complete and understandable file history of this *inter partes* review.

REQUEST TO EXPUNGE

RPX's First Alternative

RPX does not carry its burden under the first proposed alternative. RPX and Apple essentially maintain that expunging from the record all documents that have been filed under seal in this proceeding, strikes the appropriate balance, because the parties and Apple previously balanced the interests and agreed upon the information to be sealed and redacted. In addition, according to RPX and Apple, the Board easily can implement the proposal. *See* Motion 3–4.

VirnetX opposes, arguing that Apple has not shown good cause. *See id.* at 5. When the documents were sealed and filed initially, the Board had not weighed the public interest from the perspective of creating a complete and *final* record, after rendering its Decision Denying Institution. RPX does not maintain that the parties and Apple weighed the public interest in reaching its agreements as to sealing and redacting the multitude of papers and exhibits during the proceeding.

RPX is correct that the Board reasoned that the previously redacted version of the Decision Denying Institution (Paper 53) struck the appropriate balance. *See* Motion 2–3 (citing Paper 54). Nevertheless, in rendering our Order (Paper 54) concerning the redaction of the Decision Denying Institution, we implicitly considered the public's interest in having immediate access to the Decision Denying Institution, and struck a balance that favored keeping more information confidential, at least for a limited time, to ensure that Apple's and RPX's interests were protected.

Now, however, from the perspective of creating a final, permanent, public record, including all the exhibits and papers sought to be expunged and redacted, and taking into account the parties interests, including real party-in-interest Apple's, we determine that RPX has not met its burden on the first alternative. Expunging all previously sealed information, and retaining the previously redacted

versions in their place, would result in less than “a complete and understandable file history” and result in an overly inclusive expungement of information that RPX does not show is “truly sensitive.” *See* TPG at 48,760.

Accordingly, we deny RPX’s first requested alternative: the request to expunge all papers and exhibits filed under seal.

RPX’s Second Alternative

Exhibits 2045, 2048–2050, 2052–2057, and 2060

RPX requests the removal of certain individual names from these exhibits, and in some of the exhibits, contact information. RPX proposes generally replacing the redacted names and/or contact information with the entity associated with the individual (i.e., either “Apple” or “RPX”). RPX makes further and similar showings with respect to requesting redaction of confidential information from a portion of Exhibit 2052. Apple does not oppose the requests. *See* Motion 11–13.

VirnetX argues that RPX did not show good cause, allegedly because individual names are not in the nature of a “trade secret or other confidential research, development, or commercial information.” *See* Motion 11 (quoting TPG at 48,761). *See id.* at 12–13.

RPX maintains that its employee’s names and contact information, and other information specified, are confidential. *See* Motion 11. The Board’s Decision Denying Institution does not rely on any such information, that information is not required for a complete understanding of the record, and VirnetX does not explain how the public has a discernable interest in these specific names and contact information, or the information sought to be redacted from Exhibit 2052. On balance, RPX shows good cause to retain, as public, the redacted versions of Exhibits 2045, 2048–2050, 2052–2057, and 2060, and to expunge the sealed versions thereof.

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
