VOICEBOX ICM ERROR

VOICEBOX OGM ERROR

## "AUDIO DEVICE BUSY"

VocalChat was trying to play or receive sound, in talk or broadcast mode, using your audio device, but the device was being used by another application. When VocalChat tries to play the audio indications (ring, busy, etc.), and the audio device is busy, it will beep using the internal PC speaker instead.

- ✦ Quit or stop any other application that uses audio, before trying to talk with VocalChat or install another audio card in your computer.
- ✦ The other user will get an error message and the call will disconnect.

## "BAD AUDIO FORMAT"

VocalChat could not perform a conversation with another VocalChat because of incompatible audio formats. For example, this could happen if one side uses only a VocalTec Compression Card which supports only the Compressed VDF format, while the other side has some other audio card.

- Make sure both sides of the conversation use a compatible audio card.

## "CAN'T RUN VOICEBOX"

An error occurred while trying to run the Voice Box browser from VocalChat.

- If there is not enough memory (you can't run any other Windows application), try to quit one or more applications, then try to run the Voice Box browser again.
- If you still can't run the Voice Box browser by clicking the Voice Box browser icon in the VocalChat program group, and the problem is not memory, run the VocalChat Setup program again.

# Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

## Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

## Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

## Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

## API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

## LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

## FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

## E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
