REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Claims 45-57 are allowable over the prior art of record because the prior art of record does not teach an ionization source that generates a weakly-ionized plasma from a feed gas contained in a chamber, the weakly-ionized plasma substantially eliminating the probability of developing an electrical breakdown condition in the chamber; and a power supply that supplies power to the weakly-ionized plasma through an electrical pulse that is applied across the weakly-ionized plasma, the electrical pulse having at least one of a magnitude and a rise-time that is sufficient to transform the weakly-ionized plasma to a strongly-ionized plasma without developing an electrical breakdown condition in the chamber.

Claims 58-69 are allowable over the prior art of record because the prior art of record does not teach ionizing a feed gas in a chamber to form a weakly-ionized plasma that substantially eliminates the probability of developing an electrical breakdown condition in the chamber; and supplying an electrical pulse across the weakly-ionized plasma that excites atoms in the weakly-ionized plasma, thereby generating a strongly-ionized plasma without developing an electrical breakdown condition in the chamber.

Claims 70-77 are allowable over the prior art of record because the prior art of record does not teach an ionization source that generates a weakly-ionized plasma proximate to the cathode, the weakly-ionized plasma substantially eliminating the probability of developing an electrical breakdown condition between the anode and the cathode; and a power supply that is electrically coupled to the anode and to the
