PATENT

Attorney Docket No.: ZON-002CN

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

APPLICANT: Chistyakov

SERIAL NO.: 10/897,257 GROUP NO.: 1795

FILING DATE: July 22, 2004 EXAMINER: Rodney Glenn

McDonald

TITLE: METHODS AND APPARATUS FOR GENERATING HIGH-

DENSITY PLASMA

Commissioner for Patents P.O. Box 1450 Alexandria, Virginia 22313-1450

AMENDMENT AND RESPONSE

Sir:

The following remarks are responsive to the Office Action mailed on March 27, 2008 in the above-identified patent application. Consideration of the following remarks, and allowance of the claims, as presented, is respectfully requested. A Petition for a three month extension of time, up to and including September 27, 2008 is submitted herewith. Authorization to charge Attorney's charge card for the extension fee and any other proper fees was given in the EFS-Web filing submission papers.

Amendments to the claims begin on page 2 of this paper.

Remarks are on page 9 of this paper.

Amendment and Response

U.S.S.N.: 10/897,257

Attorney Docket No.: ZON-002CN

Page 2

Amendments to the Claims

Please amend claims 45, 58, 70, and 78 as follows:

45. (Currently Amended): An apparatus for generating a strongly-ionized plasma, the

apparatus comprising:

a. an ionization source that generates a weakly-ionized plasma from a feed gas

contained in a chamber, the weakly-ionized plasma reducing substantially

eliminating the probability of developing an electrical breakdown condition in the

chamber; and

b. a power supply that supplies power to the weakly-ionized plasma though an

electrical pulse that is applied across the weakly-ionized plasma, the electrical

pulse having at least one of a magnitude and a rise-time that is sufficient to

transform the weakly-ionized plasma to a strongly-ionized plasma without

developing an electrical breakdown condition in the chamber.

46. (Original): The apparatus of claim 45 wherein the pulsed power supply is a component

in the ionization source.

47. (Original): The apparatus of claim 45 wherein the ionization source is chosen from the

group comprising an electrode coupled to a DC power supply, an electrode coupled to an

AC power supply, a UV source, an X-ray source, an electron beam source, an ion beam

source, an inductively coupled plasma source, a capacitively coupled plasma source, and

a microwave plasma source.

Attorney Docket No.: ZON-002CN

Page 3

48. (Original): The apparatus of claim 45 wherein the power supply generates a constant

power.

49. (Original): The apparatus of claim 45 wherein the power supply generates a constant

voltage.

50. (Original): The apparatus of claim 45 wherein the power supply supplies power to the

weakly ionized plasma at a time that is between about fifty microsecond and five second

after the ionization source generates the weakly-ionized plasma.

51. (Original): The apparatus of claim 45 wherein the power supply supplies power to the

weakly ionized plasma for a duration that is sufficient to generate a quasi-static electric

field across the weakly-ionized plasma.

52. (Original): The apparatus of claim 45 wherein the cathode is generally formed in the

shape of at least one circular disk.

53. (Original): The apparatus of claim 45 wherein the ionization source generates the

weakly-ionized plasma from a reactive feed gas contained in a chamber.

54. (Original): The apparatus of claim 45 further comprising a magnet that is positioned to

generate a magnetic field proximate to the weakly-ionized plasma, the magnetic field

trapping electrons in the weakly-ionized plasma.

55. (Original): The apparatus of claim 54 wherein the magnet generates a magnetic field that

is shaped to trap secondary electrons that are produced by ion bombardment.

Amendment and Response U.S.S.N.: 10/897,257

Attorney Docket No.: ZON-002CN

Page 4

56. (Original): The apparatus of claim 45 further comprising a gas line that is coupled to the chamber, the gas line supplying feed gas to the strongly-ionized plasma that transports the strongly-ionized plasma by a rapid volume exchange.

- 57. (Original): The apparatus of claim 56 wherein the gas volume exchange permits additional power to be absorbed by the strongly-ionized plasma.
- 58. (Currently Amended): A method for generating a strongly-ionized plasma, the method comprising:
 - a. ionizing a feed gas in a chamber to form a weakly-ionized plasma that reduces
 substantially eliminates the probability of developing an electrical breakdown
 condition in the chamber; and
 - b. supplying an electrical pulse across the weakly-ionized plasma that excites atoms in the weakly-ionized plasma, thereby generating a strongly-ionized plasma without developing an electrical breakdown condition in the chamber.
- 59. (Original): The method of claim 58 wherein the ionizing the feed gas comprises exposing the feed gas to one of a static electric field, an pulsed electric field, UV radiation, X-ray radiation, electron beam radiation, and an ion beam.
- 60. (Original): The method of claim 58 wherein at least one of a rise time and magnitude of the electrical pulse supplied across the weakly-ionized plasma is selected to increase a density of the weakly-ionized plasma.

Amendment and Response

U.S.S.N.: 10/897,257

Attorney Docket No.: ZON-002CN

Page 5

61. (Original): The method of claim 58 wherein at least one of a rise time and magnitude of

the electrical pulse supplied across the weakly-ionized plasma is selected to excite atoms

in the weakly-ionized plasma to generate secondary electrons that increase an ionization

rate of the weakly-ionized plasma.

62. (Original): The method of claim 58 wherein at least one of a rise time and magnitude of

the electrical pulse supplied across the weakly-ionized plasma is selected to improve

uniformity of the strongly-ionized plasma.

63. (Original): The method of claim 58 further comprising supplying feed gas to the

strongly-ionized plasma to transport the strongly-ionized plasma by a rapid volume

exchange.

64. (Original): The method of claim 63 wherein the transport of the strongly-ionized plasma

by the rapid volume exchange permits additional power to be absorbed by the strongly-

ionized plasma.

65. (Original): The method of claim 58 wherein the supplying the electrical pulse comprises

applying a quasi-static electric field across the weakly-ionized plasma.

66. (Original): The method of claim 58 wherein the electrical pulse comprises a rise time

that is between about 0.1 microsecond and 10 seconds.

67. (Original): The method of claim 58 wherein a peak plasma density of the weakly-ionized

plasma is less than about 10^{12} cm⁻³.

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time** alerts and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
