I. INTRODUCTION

Microsoft seeks joinder in the event its Petition is barred under 35 U.S.C. § 315(b). Because its Petition is barred, it cannot be joined under 35 U.S.C. § 315(c), which permits joinder only if a petition “warrants the institution of an inter partes review under section 314.” Microsoft’s request is based on a partial quotation of 35 U.S.C. § 315(c), which omits the above language, and is also contrary to the broader statutory framework of the America Invents Act.

Microsoft’s requested joinder would also add unnecessary complexity and the likelihood of delay to the proceedings. Though Microsoft contends that joinder will allow for “efficient” and “timely” resolution (Paper No. 3 at 3), the fact is that joinder would substantively and procedurally complicate the RPX proceeding because different declarants are involved in each proceeding. And Microsoft apparently anticipates presenting divergent arguments from RPX’s, claiming that “Microsoft’s interests will not be fully and fairly represented in the RPX IPR” absent joinder. (*Id.* at 8.) Although one may question that claim given that RPX’s website identifies Microsoft as an RPX client (Ex. 2001), Microsoft’s argument foreshadows differing positions that will necessarily complicate the proceedings.

Joinder is also inappropriate because the Board should not institute RPX’s IPR2014-00171 for the reasons discussed in Patent Owner’s Preliminary Response in that proceeding, including that RPX’s ’171 Petition fails to name a real party-in-

interest in violation of 35 U.S.C. § 312(a)(2), is time-barred under § 315(b), and has a number of other substantive and procedural defects. (IPR2014-00171, Paper No. 35 at 2-17.) Not instituting RPX's '171 proceeding would moot Microsoft's request for joinder.

Accordingly, VirnetX respectfully requests that the Board deny Microsoft's request to join its IPR2014-00558 with RPX's IPR2014-00171.

II. PRECISE RELIEF REQUESTED

VirnetX requests that the Board deny Microsoft's motion for joinder.

III. STATEMENT OF FACTS

VirnetX first served Microsoft with a complaint alleging infringement of U.S. Patent No. 6,502,135 ("the '135 patent") on February 15, 2007. (Ex. 2002.) That litigation, *VirnetX, Inc. v. Microsoft Corp.*, No. 6:07-cv-00080 (E.D. Tex.) ("the 2007 Litigation") proceeded to a jury trial, in which Microsoft was found to willfully infringe the '135 patent and Microsoft's invalidity arguments were rejected. (Ex. 2003.)

On March 17, 2010, VirnetX filed a separate suit against Microsoft alleging infringement of the '135 patent by different products—*VirnetX, Inc. v. Microsoft Corp.*, No. 6:10-cv-00094 (E.D. Tex.) ("the 2010 Litigation"). Microsoft's counsel accepted service of the complaint on March 22, 2010 (Ex. 2004) and Microsoft filed an agreed motion to extend its deadline to respond to the complaint based on

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
