PREFACE

The papers in this Special Publication were originally written to fulfill competition requirements of the 1996 FutureCar Challenge. These papers document the design, construction, performance, and planned improvements of 12 high-efficiency vehicle designs, which represent the results of the first of two years of this competition. A paper describing the competition's individual events, results, and successful designs has also been included.

The 1996 FutureCar Challenge was held at Ford Motor Company's Dearborn Proving Grounds and at the Environmental Protection Agency's National Fuels and Emissions Laboratory in Ann Arbor, Michigan during June of 1996. The 1996 FutureCar Challenge was jointly sponsored by the U.S. Department of Energy and the U.S. Council for Automotive Research. The mission of the Challenge was to develop and demonstrate advanced fuel-efficient vehicles that parallel the technology development path of the Partnership for a New Generation of Vehicles (PNGV) program. The PNGV development path culminates in a mid-size car having up to three times the fuel efficiency while maintaining the performance, safety, and affordability of today's production vehicles. At the same time as contributing to achieving the objectives of the Partnership, the FutureCar Challenge was to help improve engineering education and foster practical learning through the development of solutions to real-world engineering problems.

The FutureCar Challenge is a goal-oriented competition. With the exception of specific performance and safety standards, the teams were left to solve the problems of producing a highly efficient vehicle themselves. This resulted in a wide variety of technologies with the potential for solving some of the technical problems associated with radically increasing the fuel efficiency of today's vehicles. While most of the teams chose to convert their donated Luminas, Intrepids, and Tauruses to hybrid electric vehicles, some chose other directions. Some vehicles were fueled with alternative fuels, while some used reformulated gasoline or low-sulfur diesel fuel.

The dedication of the students and faculty in constructing these highly efficient vehicle prototypes cannot be fully conveyed within the scope of these papers. On behalf of all of the participants and organizers of the FutureCar Challenge, we extend many thanks to the participants and to those companies without whose support, whether through financial contributions or in-kind, the 1996 FutureCar Challenge could not have been brought to such a successful culmination.

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
