

UNITED STATES PATENT AND TRADEMARK OFFICE

BEFORE THE PATENT TRIAL AND APPEAL BOARD

TAIWAN SEMICONDUCTOR MANUFACTURING COMPANY, LTD.
AND TSMC NORTH AMERICA CORP.

Petitioner

v.

ZOND, LLC
Patent Owner

U.S. Patent No. 7,604,716

Inter Partes Review Case No. 2014-00807

**PATENT OWNER'S PRELIMINARY RESPONSE
UNDER 37 CFR § 42.107(a)**

TABLE OF CONTENTS

I. INTRODUCTION.....	1
II. TECHNOLOGY BACKGROUND	6
A. Overview of Plasma Generation Systems	6
B. The ‘716 Patent: Dr. Chistyakov Invents an Improved Plasma Source.	9
III. SUMMARY OF PETITIONER’S PROPOSED GROUNDS	15
IV. CLAIM CONSTRUCTION UNDER 37 C.F.R. §§ 42.104(B)(3).....	15
A. Construction of “Weakly Ionized Plasma” and “Strongly Ionized Plasma”	15
B. Construction of “Ionizing a Feed Gas in a Chamber”	17
C. Construction of “a Weakly Ionized Plasma that Substantially Eliminates the Probability of Developing an Electrical Breakdown Condition in the Chamber”	18
V. PETITIONER HAS FAILED TO SHOW A REASONABLE LIKELIHOOD OF PREVAILING.	20
A. Defects in Ground I: Petitioner Failed To Demonstrate That Claims 14 – 18, and 25 - 32 Are Obvious In view of Mozgrin Combined with Kudryavtsev.....	20
1. Overview of Independent Claim 14.....	20
2. Legal Standards For Comparison of the Claim to the Prior Art.	23
2. Scope and Content of Prior Art.	25
a. Overview of Mozgrin.....	25
b. Overview of Kudravtsev	27
3. Differences Between Claim 14 and the Prior Art.	31
a. Differences Between Mozgrin and Claim 14	31
b. Petitioner Fails to Prove Inherency.....	34
c. Incompatibilities of Kudravtsev and Mozgrin.....	36

d.	Differences Between Claim 14 and Kudravytsev	39
e.	Conclusion: Petitioner Fails to Show a Reasonable Likelihood that Claim 14 is Obvious in View of Mozgrin Combined With Kudravytsev	40
f.	Differences Between the Prior Art and the Other challenged Claims 15 – 18, 25 - 32	41
B.	Defects In Ground II: Petitioner Failed To Demonstrate A Reasonable Likelihood That the Challenged Claims Are Obvious in View of Wang Combined with Kudravytsev.....	44
1.	Overview of Wang.	44
2.	Differences Between Wang and the Claims.	46
3.	Petition Fails to Prove Inherency.....	49
4.	Incompatibilities of Kudravytsev and Wang	50
5.	Differences Between Claim 14 and Kudravytsev	52
6.	Conclusion: Petitioner Fails to Show a Reasonable Likelihood that Claim 14 is Obvious in View of Wang Combined With Kudravytsev	52
7.	Differences Between the Prior Art and the Other Challenged Claims 15 – 18, 25 - 32.....	53
C.	Petition Violates Page Restrictions by Incorporating Sixty-Six Pages of Claim Charts.....	54
VI.	CONCLUSION.....	55

I. Introduction

The Petitioner has represented in a motion for joinder that this petition “is identical to the Intel IPR no. IPR2014-00522 in all substantive respects, includes identical exhibits, and relies upon the same export declarant.”

Accordingly, based upon that representation, the Patent Owner opposes review on the same basis presented in opposition to Intel’s request no. IPR-2014-00522, which is reproduced below:

The present petition for *inter partes* review of U.S. Patent No. 7,604,716 (“the ‘716 patent”) is the third of four petitions filed by Intel challenging the ‘716 patent. This petition challenges two of the patent’s four independent claims (nos. 14, 26) and several other claims that depend from claims 14, 26.

The challenges are based on two prior art references, Mozgrin¹ and Wang,² that were already considered by the Patent Office, combined with a prior art article by Kudryavtsev.³ As explained in detail below, the challenged claims require, inter alia, a multi-stage ionization process in which atoms in a weakly ionized gas are first excited from the ground state before being ionized

¹ Ex. 1203, Mozgrin.

² Ex. 1204, Wang patent No. 6,413,382 (“Wang”).

³ Ex. 1205, Kudryavtsev.

to form a strongly ionized plasma, but without developing an electrical breakdown condition. This is in contrast to a conventional ionization process in which atoms are ionized directly from the ground state, without first achieving an excited state.

The Petition tacitly acknowledges that neither primary reference, Mozgrin nor Wang, explicitly discusses or even hints of such an ionization process. So the Petition instead argues that Mozgrin and Wang inherently implement the claimed multi-stage ionization, citing to Kudryavtsev as proof. But as a matter of law, “inherency may not be established by probabilities or possibilities.”⁴ As the Board observed in a similar case: “it is well settled that the ‘very essence of inherency is that one of ordinary skill in the art would recognize that a reference *unavoidably* teaches the property in question.”⁵ “The mere fact that a certain thing may result from a given set of circumstances is not sufficient.”⁶

⁵ *UBE Maxwell Co. v. LG Chem, LTD*, IPR203-00470, Paper 25, page 12, *citing Agilent Technologies, Inc. v. Affymetrics, Inc.*, 567 1366, 1383 (Fed. Cir. 2009).

⁶ *In re Oelrich*, 666 F.3d 578, 581 (CCPA 1981).

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
