"the voltage pulse having at least one of a controlled amplitude and a controlled rise time that increase an ionization rate so that a rapid increase in electron density" ..., in combination with the remaining claimed limitations as claimed in independent claim 64 (claims 65-73 are allowed as being dependent on claim 64).
 - A method ... comprising ... "the voltage pulse having at least one of a controlled amplitude and a controlled rise time that shifts an electron energy distribution in the plasma to higher energies that increase an ionization rate so as to result in a rapid increase in electron density" ..., in combination with the remaining claimed
