

UNITED STATES PATENT AND TRADEMARK OFFICE

BEFORE THE PATENT TRIAL AND APPEAL BOARD

FUJITSU SEMICONDUCTOR LIMITED and
FUJITSU SEMICONDUCTOR AMERICA, INC.

Petitioner

v.

ZOND, LLC
Patent Owner

Case IPR2014-00918
Patent 6,805,779

ZOND LLC'S PATENT OWNER PRELIMINARY RESPONSE
PURSUANT TO 37 C.F.R. § 42.107(a)

TABLE OF CONTENTS

I. INTRODUCTION 1

II. TECHNOLOGY BACKGROUND 9

 A. Overview Of Plasma Generation 9

 B. The '779 patent: Dr. Chistyakov invents a new plasma generator containing a feed gas source, an excited atom source with a magnet that traps electrons, a plasma chamber that confines excited atoms, and an energy source that ionizes the confined excited atoms in a multi-step ionization process. 11

 C. The Petitioner Mischaracterized The File History..... 15

III. SUMMARY OF THE PETITIONER’S PROPOSED GROUNDS FOR REVIEW .. 17

IV. ZOND’S CLAIM CONSTRUCTIONS..... 18

 A. The construction of “multi-step ionization process”. 19

V. THERE IS NO REASONABLE LIKELIHOOD OF PETITIONER PREVAILING AS TO A CHALLENGED CLAIM OF THE '779 PATENT. 19

 A. The Petition failed to demonstrate any motivation to combine. 21

 1. Scope and content of prior art. 23

 a. Mozgrin..... 24

 b. Kudryavtsev 26

 c. Iwamura 30

 d. Pinsley and Angelbeck..... 31

 e. Gruber 32

 f. Wells 33

 2. The Petitioner Fails To Show That It Would Have Been Obvious To Combine Either Kudryavtsev’s Cylindrical Device Without A Magnet or Pinsley’s Gas Laser With The Magnetron System Of Mozgrin. 34

 3. The Petitioner Failed To Show That It Would Have Been Obvious To Combine Angelbeck’s Gas Laser With The Plasma Treatment Apparatus Of Iwamura. 39

4.	The Petitioner Failed To Show That It Would Have Been Obvious To Combine Gruber’s Gas Laser With Either The Magnetron Sputtering Apparatus of Mozgrin Or The Plasma Treatment Apparatus Of Iwamura.	41
5.	The Petitioner Failed To Show That It Would Have Been Obvious To Combine Wells’ Gas Photon Laser With Either The Magnetron Sputtering Apparatus of Mozgrin, The Plasma Treatment Apparatus Of Iwamura, or Pinsley’s Laser	43
B.	The Petition failed to demonstrate how the alleged combinations teach every element of the challenged claims.	46
1.	The combination of Mozgrin, Kudryavtsev, Pinsley, Wells and/or Gruber does not teach “an excited atom source that receives ground state atoms from the feed gas source” as recited in independent claim 1, as similarly recited in independent claim 18, and as required by challenged dependent claims 7, 9, 20, and 21.	47
2.	The combination of Mozgrin, Kudryavtsev, Pinsley, Wells and/or Gruber does not teach “the excited atom source comprising a magnet that generates a magnetic field for substantially trapping electrons proximate to the ground state atoms” as recited in independent claim 1, as similarly recited in independent claims 18 and 30, and as required by challenged dependent claims 7, 9, 20, 21, and 38.....	48
3.	The combination of Mozgrin, Kudryavtsev, Pinsley, Wells and/or Gruber does not teach “a plasma chamber that is coupled to the excited atom source, the plasma chamber confining a volume of excited atoms generated by the excited atom source” as recited in independent claim 1, as similarly recited in independent claims 18 and 44, and as required by challenged dependent claims 7, 9, 20, and 21.....	49
4.	The combination of Mozgrin, Kudryavtsev, Pinsley, Wells and/or Gruber does not teach “an energy source that is coupled to the volume of excited atoms confined by the plasma chamber” as recited in independent claim 1, as similarly recited in independent claims 18 and 44, and as required by challenged dependent claims 7, 9, 20, and 21.....	49
5.	The combination of Iwamura, Angelbeck, Gruber and/or Wells Does Not Teach a “plasma generator that generates a plasma with a multi-step ionization process,” As Recited In Independent Claim 1, As Similarly Recited In Claims 18, 30, and 44, And As Required By Challenged Dependent Claims 7, 9, 20, 21, and 38	50
6.	The combination of Iwamura, Angelbeck, Gruber, and/or Wells Does Not Teach “the excited atom source comprising a magnet that generates a magnetic field for substantially trapping electrons proximate to the ground	

state atoms,” As Recited In Independent Claim 1, As Similarly Recited In Independent Claims 18 and 30, And As Required By Challenged Dependent Claims 7, 9, 20, 21, and 3851

7. The Combination Of Iwamura, Angelbeck, Gruber and/or Wells Does Not Teach “the energy source raising an energy of excited atoms in the volume of excited atoms so that at least a portion of the excited atoms in the volume of excited atoms is ionized,” As Recited In Independent Claim 1, As Similarly Recited In Independent Claims 18, 30, and 44, and As Required By Challenged Dependent Claims 7, 9, 20, 21, and 38.....52

C. The Petition Failed to Identify Any Compelling Rationale for Adopting Redundant Grounds of Rejection.....54

VI. CONCLUSION.....58

I. INTRODUCTION

The Board should deny the present request for *inter partes* review of U.S. Patent No. 6,805,779 (“the ’779 patent”) because there is not a reasonable likelihood that the Petitioner will prevail at trial with respect to at least one claim of the ’779 patent.¹

Indeed, there are five different and independent groups of reasons why the Petitioner cannot prevail. First, the reference that is primarily relied upon by the Petitioner (*i.e.*, Mozgrin) was already considered by the Examiner and overcome during the prosecution of the application that led to the issuance of the ’779 patent. Indeed, Mozgrin was considered by 6 different examiners and overcome during the prosecution of 9 other patents that are related to the ’779 patent over nearly a 10 year period.²

¹ 35 U.S.C. § 314(a).

² Examiners Douglas Owens, Tung X. Le, Rodney McDonald, Wilson Lee, Don Wong, and Tuyet T. Vo allowed U.S. Patents 7,147,759, 7,808,184, 7,811,421, 8,125,155, 6,853,142, 7,604,716, 6,896,775, 6,896,773, 6,805,779, and 6,806,652 over Mozgrin and Wang over nearly a decade from the time that the application for the ’759 patent was filed on 9/30/2002 to the time that the ’155 patent issued on 2/28/2012.

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
