Cat.No. 15-1

REALISTIC

PROGRAMMABLE EIGHT IN ONE
UNIVERSAL REMOTE CONTROL
FEATURES

Your Realistic 8-in-1 Universal Remote Control (URC) replaces the infrared remote controls for up to eight audio/video components by learning their remote control command codes. In today's complex audio/video systems, this eliminates confusion about which remote control to use and does away with an ugly pile of remote controls on your end table or night stand.

However, replacing the individual remote controls is only a part of what the URC can do. You can program the URC to perform sequences of up to 48 commands that involve up to eight different remote control components.

The URC also has a schedule feature that can automatically activate sequences for up to 16 separate start/stop entries. Each entry can be performed daily, weekly, or on a one-time-only basis.

Your URC uses battery power so that power shortages will not upset the URC's timer settings.

Teaching remote commands to the URC is a simple process, but it requires attention to detail. Be sure to read and follow all instructions in this manual.

Other features include:

- Large, easy-to-read liquid crystal display
- Favorite-channel selection of up to 32 channels
- Quick Timer Recording (QTR) for one-key timed recordings

For your permanent records, we urge you to record the serial number of your URC in the space provided. The serial number is on the label on the back of the URC.
Serial Number: _124783_

CONTENTS

A QUICK LOOK AT YOUR URC

- IR Sensor Window
- LCD Display
- IR Range Indicator
- P IN P (Picture In Picture) Key
- SEQUENCE Key
- CANCEL Key
- Display LIGHT Button
- Battery Compartment (On back)
- LEARN Key
- DELETE Key
- SELECT Keys
- CHANNEL Key
- VOLUME Key
- QTR (Quick Timer Recording) Key
- ASMS Key
- SCAN Key
- IR Receiver Window

The URC uses four AA batteries. Use only alkaline batteries (Radio Shack Cat. No. 23-552). The URC requires the extra power of alkalines and might not perform properly with standard or rechargeable batteries.

1. Remove the battery compartment cover by pressing it in the direction of the arrow.

2. Install four new AA batteries, observing the polarity (+ and —) symbols marked inside the battery compartment.
3. If you are installing batteries for the first time, press and hold [CANCEL]. Then, use a pen or pencil to press [RESET] inside the battery compartment. The reset feature is a two-key sequence to prevent accidental use.
RESET

Caution: Press [CANCEL] and [RESET] only when you are installing batteries for the first time. Pressing [CANCEL] and [RESET] erases all learned commands in the URC's memory. See "Troubleshooting."

4. Replace the compartment cover.

Notes:

● A set of batteries provides power for up to six months of normal use. However, to avoid loss of the learned commands and command sequences, replace the batteries as soon as you see **BAT LOW** appears on the display.

TIME:

BAT LOW

TV
● The URC retains learned commands and command sequences in memory for 5 minutes without batteries. Be sure you have new batteries ready to install before you remove the old batteries.

● The clock stops running when you remove the batteries. You must reset the clock each time you replace the batteries.

● Never leave weak batteries in the URC. They can leak damaging chemicals.

● Do not mix old and new batteries.

7

UNDERSTANDING THE URC

Before you use the URC, it will help to understand a little about how it works.

USING SOME KEYS SEVERAL TIMES

The URC has 38 programmable keys. You can teach each command-key up to eight different remote control commands–one command for each of the eight device indicators (TV, VCR1, VCR2, CABLE, RCVR, CD, SAT, and AUX), up to the available memory space. Before you teach or use a command, press the SELECT key [◀] or [▶] to select the desired device.

Each time you press a SELECT key, the next device indicator appears on the display. After you reach the last device indicator at the end of the display, the display *wraps* to the indicator at the opposite end of the display.

Although some device indicators have specific names (TV, VCR, SAT, CABLE, and so on), you can teach remote control commands for any remote control component using any device indicator setting. The names are only for reference.

The names on the command keys are also only for reference. Although it is best to use an URC key that has the same name (or a similar name) as the remote control key whose command it is being taught, you can teach any remote control command to any URC key.

For example, you can teach the *repeat-play* command for your CD player to [TV/VCR] on the URC.

Note: The URC can only learn infrared commands, Old-fashioned, ultrasonic remote controls are not compatible with the URC.

SETTING THE TIME

When you first turn on the URC, it enters the *run* mode. **TIME** appears on the display and the display shows the time as **12:00 a.m.** and the day as **MON. TV** also appears on the display.

1. Press [LEARN]. The **LEARN** indicator appears. Then, **SELECT** and **KEY** alternately appear on the display for 60 seconds.

TIME:		LEARN:
	SELECT	
TV		
	KEY	
2. Press [TIME/DAY]. **0:00AM** appears on the display. Use the number keys to enter the desired time. Example: **12:34.**
TIME:		
	0:00	
TV		AM

3. Use the SCROLL [▲] or [▼] key to set a.m. or p.m.
DOCKET ALARM

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming inter-face) to developers that want to integrate case filings into their apps.

LAW FIRMS
Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS
Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS
Sync your system to PACER to automate legal marketing.

fastcase
Smarter legal research.
