ACKNOWLEDGEMENTS.

The author would like to thank the University of Houston Department of Chemistry and the American Association of University Women for their financial support during the preparation of this dissertation through teaching assistant-ships and grants. Without the financial assistance of these groups, the completion of this work would have not been possible.

I would also like to acknowledge the faculty and staff of the Department of Chemistry at the University of Houston for their expertise and friendship. A special note of thanks is extended to Randy Wilkin, Ed Ezell, and Beatriz Fitz. Also, I would like to thank Drs. Douglas F. Dyckes, Thomas L. Lemke, Gary E. Martin, and Randolph P. Thummel for their additional comments on this work.

A special acknowledgement goes to Dr. Darrell Watson whose initial findings made this project worthwhile to continue. Also, I would like to recognize Lisa Albee and Andrew McCallum for their technical assistance. I would also like to thank the past and present members of Dr. Kohn's research group who have been so very helpful along the way.

I am grateful to my family for their love, encouragement, and patience. Thank you, Jody, Mike, Rand, Jennifer, and Tony.

I am indebted to my husband, Mark, for his encouragement and love which has been a constant throughout this work. I would like to thank him for keeping our daily lives short of chaos and always being there with a word of kindness

when I needed it the most.   There is no one else who could have put up with me during this time.

Finally, I extend my deepest gratitude to Dr. Harold Kohn. His knowledge, wisdom, patience, sense of humor, understanding, enthusiasm, and encouragement directed me every inch of the way. His belief in me as a person and a chemist never waivered, even when my abilities were questioned by myself and others. Thank you just is not enough.

DOCKET ALARM

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS
Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS
Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS
Sync your system to PACER to automate legal marketing.
