(57) **ABSTRACT**

In a first embodiment of an optical switch having at least one dual axis micromirror, the micromirror is manipulated about two generally perpendicular axes by varying voltage patterns along two electrostatic arrangements. The two electrostatic arrangements may be formed to independently drive two movers, or may be formed to control a mover that is displaceable in two directions. The micromirrors and the movers that control the micromirrors may be integrated onto a single substrate. Alternatively, the micromirrors may be formed on a substrate that is attached to the substrate that includes the mover or movers. In a second embodiment of an optical switch in accordance with the invention, the switch includes two collimator arrays and two dual axis micromirror arrays. Each first micromirror in the first micromirror array is dedicated to one of the collimators in the first collimator array. Similarly, each second micromirror of the second micromirror array is dedicated to one of the collimators of the second collimator array. By manipulating a first micromirror, an input signal from the associated first collimator can be reflected to any of the second micromirrors. By manipulating the second micromirror that receives the signal, the signal can be precisely positioned on the second collimator that is associated with the second micromirror.

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
