(52) **U.S. Cl.** **455/3.06; 455/566**

An audio system and method are disclosed. A system incor-
porating teachings of the present disclosure may include, for
example, an electronic device having a display, a wireless
receiver, and a housing component at least partially defining
a cavity in which the wireless receiver is secured. The system
may also include a device interface system that has a sound
system connector and a mounting region. The sound system
connector may communicatively coupled the device interface
system to an existing sound system, and the mounting region
may be capable of releasably engaging the electronic device
such that a contact portion of the device interface system
contacts a conductive element of the electronic device to form
at least a portion of a communication path interconnecting the
sound system and the electronic device.
