DENIAL OF REQUEST FOR POWER OF ATTORNEY

The request for Power of Attorney filed 05/06/2013 is acknowledged. However, the request cannot be granted at this time for the reason stated below.

- The Power of Attorney you provided did not comply with the new Power of Attorney rules that became effective on June 25, 2004. See 37 CFR 1.32.
- The revocation is not signed by the applicant, the assignee of the entire interest, or one particular principal attorney having the authority to revoke.
- The Power of Attorney is from an assignee and the Certificate required by 37 CFR 3.73(c) has not been received.
- The person signing for the assignee has omitted their empowerment to sign on behalf of the assignee.
- The inventor(s) is without authority to appoint attorneys since the assignee has intervened as provided by 37 CFR 3.71.
- The signature(s) of _____, a co-inventor in this application, has been omitted. The Power of Attorney will be entered upon receipt of confirmation signed by said co-inventor(s).
- The person(s) appointed in the Power of Attorney is not registered to practice before the U.S. Patent and Trademark Office.
- Only one Customer Number can be designated for the Power of Attorney in an application. The Customer Number that was captured is the first Customer Number provided on the Power of Attorney document.
- A request under 37 CFR 1.48 to add an inventor was granted in this application, however, no power of attorney consistent with the power of attorney granted by the originally named inventive entity has been received. Thus, the addition of the inventor has resulted in the loss of power of attorney in the application. See 37 CFR 1.32(e).

- The power of attorney has not been accepted because the party who is giving power of attorney has not been identified. Power of attorney may only be signed by the applicant for patent (37 CFR 1.42) or the patent owner. A patent owner who was not the applicant must appoint any power of attorney in compliance with 37 CFR 3.71 and 3.73. See 37 CFR 1.32(b)(4).
- The power of attorney from the inventors has not been accepted because it is a copy from a prior national application for which benefit is claimed and the continuing application names an inventor who was not named as an inventor in the prior application.
- The power of attorney from the inventors has not been accepted because the power of attorney must be signed by the applicant for patent. See 37 CFR 1.32(b)(4).
- Any request to correct or update the name of the applicant must include an application data sheet (ADS) in compliance with 37 CFR 1.76 specifying the correct or updated name of the applicant in the applicant information section. Any request to change the applicant after an original applicant has been specified under 37 CFR 1.46(b) must include a new ADS in compliance with 37 CFR 1.76 specifying the applicant in the applicant information section and comply with 37 CFR 3.71 and 3.73. See 37 CFR 1.46(c).

If checked, the undersigned hereby grants the USPTO authority to provide the European Patent Office (EPO), the Japan Patent Office (JPO), the Korean Intellectual Property Office (KIPO), the World Intellectual Property Office (WIPO), and any other intellectual property offices in which a foreign application claiming priority to the instant patent application is filed access to the instant patent application. See 37 CFR 1.14(c) and (h). This box should not be checked if the applicant does not wish the EPO, JPO, KIPO, WIPO, or other intellectual property office in which a foreign application claiming priority to the instant patent application is filed to have access to the instant patent application.

In accordance with 37 CFR 1.14(h)(3), access will be provided to a copy of the instant patent application with respect to: 1) the instant patent application-as-filed; 2) any foreign application to which the instant patent application claims priority under 35 U.S.C. 119(a)-(d) if a copy of the foreign application that satisfies the certified copy requirement of 37 CFR 1.55 has been filed in the instant patent application; and 3) any U.S. application-as-filed from which benefit is sought in the instant patent application.

In accordance with 37 CFR 1.14(c), access may be provided to information concerning the date of filing this Authorization.

Privacy Act Statement

The Privacy Act of 1974 (P.L. 93-579) requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether the Freedom of Information Act requires disclosure of these records.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (i.e., GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspections or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

**TERMINAL DISCLAIMER TO OBVIATE A PROVISIONAL DOUBLE PATENTING
REJECTION OVER A PENDING "REFERENCE" APPLICATION**

Docket Number (Optional)

AFF.004C11US

In re Application of: Russell W. White, et al.

Application No.: 13/673,391

Filed: November 9, 2012

For: System And Method For Managing Media (As Amended)

The owner*, Affinity Labs of Texas, LLC, of 100 percent interest in the instant application hereby disclaims, except as provided below, the terminal part of the statutory term of any patent granted on the instant application which would extend beyond the expiration date of the full statutory term of any patent granted on pending **reference** Application Number 13/658,210, filed October 23, 2012, as the term of any patent granted on said **reference** application may be shortened by any terminal disclaimer filed prior to the grant of any patent on the pending **reference** application. The owner hereby agrees that any patent so granted on the instant application shall be enforceable only for and during such period that it and any patent granted on the **reference** application are commonly owned. This agreement runs with any patent granted on the instant application and is binding upon the grantee, its successors or assigns.

In making the above disclaimer, the owner does not disclaim the terminal part of any patent granted on the instant application that would extend to the expiration date of the full statutory term of any patent granted on said **reference** application, "as the term of any patent granted on said **reference** application may be shortened by any terminal disclaimer filed prior to the grant of any patent on the pending **reference** application," in the event that: any such patent: granted on the pending **reference** application: expires for failure to pay a maintenance fee, is held unenforceable, is found invalid by a court of competent jurisdiction, is statutorily disclaimed in whole or terminally disclaimed under 37 CFR 1.321, has all claims canceled by a reexamination certificate, is reissued, or is in any manner terminated prior to the expiration of its full statutory term as shortened by any terminal disclaimer filed prior to its grant.

Check either box 1 or 2 below, if appropriate.

1. For submissions on behalf of a business/organization (e.g., corporation, partnership, university, government agency, etc.), the undersigned is empowered to act on behalf of the business/organization.

I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of the application or any patent issued thereon.

TERMINAL DISCLAIMER TO OBTAIN A DOUBLE PATENTING REJECTION OVER A "PRIOR" PATENT

Docket Number (Optional)

AFF.004C11US

In re Application of: Russell W. White, et al.

Application No.: 13/673,391

Filed: November 9, 2012

For: System And Method For Managing Media (As Amended)

The owner*, Affinity Labs of Texas, LLC, of 100 percent interest in the instant application hereby disclaims, except as provided below, the terminal part of the statutory term of any patent granted on the instant application which would extend beyond the expiration date of the full statutory term of **prior patent** No. 7,187,947; 7,778,595 as the term of said **prior patent** is presently shortened by any terminal disclaimer. The owner hereby agrees that any patent so granted on the instant application shall be enforceable only for and during such period that it and the **prior patent** are commonly owned. This agreement runs with any patent granted on the instant application and is binding upon the grantee, its successors or assigns.

In making the above disclaimer, the owner does not disclaim the terminal part of the term of any patent granted on the instant application that would extend to the expiration date of the full statutory term of the **prior patent**, "as the term of said **prior patent** is presently shortened by any terminal disclaimer," in the event that said **prior patent** later:

- expires for failure to pay a maintenance fee;
- is held unenforceable;
- is found invalid by a court of competent jurisdiction;
- is statutorily disclaimed in whole or terminally disclaimed under 37 CFR 1.321;
- has all claims canceled by a reexamination certificate;
- is reissued; or
- is in any manner terminated prior to the expiration of its full statutory term as presently shortened by any terminal disclaimer.

System And Method To Communicate Targeted Information For Managing Media

Amendments to the Specification:

Please add the following Summary beginning on page 3, after the Background and before the Brief Description of the Drawings:

Summary

In accordance with teachings of the present disclosure, a system and method for communicating selected information to an electronic device are disclosed that provide significant advantages over prior developed systems. The disclosed embodiments allow a radio listener to create a personal playlist and to listen to this playlist in a wireless atmosphere while enjoying CD quality sound.

According to one aspect of the present disclosure, a system incorporating teachings of the present invention may include a digital engine operable to maintain data representing the selected information in a digital format. In some embodiments, the digital engine may be communicatively coupled to a graphical user interface that allows a user to identify the selected information. The system may also include a communication engine communicatively coupled to the digital engine, the communication engine may be operable to wirelessly communicate the data representing the selected information to an electronic device.

The wireless communication may involve communicating via a cellular communications network. The cellular communications network may be, for example, the global system for mobile communications network (GSM), which may operate around 1.8 GHz or 1.9 GHz. The cellular communications network may also involve, for example, the code-division multiple access network (CDMA). In some embodiments, the wireless communication may involve communicating via a high-speed, low-power microwave wireless link. For example, the wireless link may include a Bluetooth link, which may operate around 2.4 GHz.

According to another aspect of the present invention, a system for communicating selected information to an electronic device is disclosed. The system includes a digital engine operable to maintain data associated with selected audio information and a communication engine communicatively coupled to the digital engine, the communication engine operable to initiate wireless communication of the data to the electronic device.

According to another aspect of the present invention, a method for communicating selected audio information to an electronic device is provided. The method includes maintaining

data associated with the selected audio information using a digital engine, and initiating wireless communication of the data to the electronic device.

According to another aspect of the present invention, an electronic device for receiving selected audio information via wireless communication is provided. The device includes a communication module operable to receive wireless communication of the selected audio information, a storage medium operably coupled to the communication module, the storage medium operable to store the selected audio information, and a processor module coupled to the communication module, the processor module operable to process the received selected audio information.

According to another aspect of the present invention, a method for communicating selected audio information to an electronic device is provided. The method includes presenting information associated with audio information within an interface associated with a communication network, receiving an input from a user identifying the selected information, maintaining data associated with the selected audio information using digital engine, and initiating wireless communication of the data to the electronic device.

According to a particularized aspect of the present invention the interface operates in a browsing environment and the wireless communication operates outside the browsing environment.

Other technical advantages will be apparent to those of ordinary skill in the art in view of the following specification, claims, and drawings.

Amendments to the Abstract:

Please replace the Abstract paragraph on page 38, with the following amended Abstract paragraph:

~~A method for targeted advertising is disclosed. The method includes accessing at least one piece of demographic information associated with a user of a portable device, selecting an advertisement to be delivered to the user based at least in part on the demographic information, and initiating communication of a version of the advertisement configured for presentation at the portable device.~~ A music enabled communication system includes a wireless telephone device with a display, a wireless communication module, a rechargeable power supply, a memory system, and a collection of instructions operable to utilize the wireless communication module to stream a signal representing a song to a recipient device using a given asynchronous wireless channel of a localized communications signaling network, to recognize receipt of an incoming call, and to alter the signal in connection with recognizing receipt of the call.

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claim 1 (currently amended): A music enabled communication system, comprising:

 a wireless telephone device, the device having (1) a display at least partially defining a front surface of the device, (2) a housing component at least partially defining a back surface of the device, (3) an enclosure located between the front surface and the back surface, (4) a wireless communication module located within the enclosure, (5) a rechargeable power supply located within the enclosure, (6) a physical interface having a first and a second conductive path, the physical interface operable to communicate data via the first conductive path and to receive a recharging power for the rechargeable power supply via the second conductive path, and (7) a memory system, located within the enclosure; and

 a collection of instructions stored in the memory system, the collection of instructions operable when executed to communicate a collection of information about media content available from the wireless telephone device to a recipient device such that the recipient device can use the collection of information to generate a graphical menu comprising a selectable menu item associated with the available media content, to utilize the wireless communication module to stream a signal representing at least a portion of a song to [[a]] the recipient device using a given asynchronous wireless channel of a localized communications signaling network, to recognize receipt of an incoming telephone call, and to alter an outputting of the signal in connection with recognizing receipt of the incoming telephone call.

Claim 2 (original): The system of claim 1, wherein the wireless communication module is compliant with a Bluetooth standard.

Claim 3 (original): The system of claim 2, further comprising an email client operable to communicate with an email server, a voicemail client operable to communicate with a voice mail server, and a browser operable to communicate with an Internet server.

Claim 4 (currently amended): The system of claim 2, wherein the wireless telephone device is a dual mode device operable to receive both a wireless digital signal and a wireless analog signal and the collection of information about media content is configured to be communicated via an interface selected from a group consisting of a channel of the localized communications signaling network and the physical interface.

Claim 5 (original): The system of claim 2, wherein the collection of instructions comprises a set of hands-free telephone instructions operable when executed to allow the wireless telephone device to operate in a hands-free mode when the wireless telephone device is wirelessly coupled with a wireless component of an automobile.

Claim 6 (original): The system of claim 1, wherein the display makes up more than half of the front surface and the wireless telephone device is operable to receive a collection of data representing a media at a hybrid of wireless communication rates that includes at least one faster rate and one slower rate.

Claim 7 (currently amended): The system of claim 1, further comprising a buffer memory located within the enclosure, wherein the wireless telephone device is operable to receive media content as a series of component parts, further wherein the wireless telephone device is operable to receive a component part of the media content at a wireless communication rate and a different component part of the ~~selected~~ media content at a different wireless communication rate, wherein the wireless telephone device is operable to cause a change in communication rates at which a given component part is received based at least partially upon an amount of data located in the buffer memory.

Claim 8 (currently amended): A system for wirelessly communicating musical content, comprising:

a portable electronic device having a processor operable to play an audio file that represents a song;

a memory communicatively coupled to the processor and configured to store a plurality of audio files; and

a wireless communication module communicatively coupled to the processor and operable to communicate a streaming audio signal that represents a playing of the song to a recipient device via a localized communications signaling network in response to a selection of a selectable menu item presented on a recipient device display, wherein the wireless communication module is compliant with a Bluetooth standard, further wherein the wireless communication module is configured to communicate at least a portion of the streaming audio signal to the recipient device using an asynchronous channel.

Claim 9 (original): The system of claim 8, wherein the portable electronic device is operable as a wireless telephone device and has (1) a display at least partially defining a front surface of the device, (2) a housing component at least partially defining a back surface of the device, (3) an enclosure located between the front surface and the back surface, (4) a rechargeable power supply located within the enclosure, and (5) a non-circular physical interface having a first and a second conductive path, the non-circular physical interface operable to communicate data via the first conductive path and to receive a recharging power for the rechargeable power supply via the second conductive path.

Claim 10 (original): The system of claim 9, wherein the portable electronic device comprises a software application, further wherein the portable electronic device is configured to accept an upgrade for the software application that is communicated to the portable electronic device via a software upgrading wireless communication.

Claim 11 (original): The system of claim 8, wherein the wireless communication module is operable to communicate the streaming audio signal at a communication rate that provides for a CD quality listening experience.

Claim 12 (original): The system of claim 8, wherein the portable electronic device is operable as a wireless telephone device and has (1) a display at least partially defining a front surface of the device, (2) a housing component at least partially defining a back surface of the device, (3) an enclosure located between the front surface and the back surface, (4) a wide area wireless communication module operable to receive a collection of data representing a media at a hybrid of wireless communication rates that includes at least a first rate and a second rate, and (5) a buffer memory, wherein a change in communication rates is at least partially based upon an amount of data located in the buffer memory.

Claim 13 (original): The system of claim 8, wherein the portable electronic device has (1) a display at least partially defining a front surface of the device, (2) a housing component at least partially defining a back surface of the device, (3) an enclosure located between the front surface and the back surface, (4) a different wireless communication module located within the enclosure and operable to receive a collection of data representing a media, wherein the wireless communication module communicatively coupled to the processor is further operable to wirelessly communicate a signal representing the media to the recipient device while the different wireless communication module is receiving the collection of data representing the media.

Claim 14 (original): The system of claim 8, further comprising an internal battery and means for recharging the internal battery.

Claim 15 (currently amended): A system for communicating advanced media content, comprising:

an audio system having a memory system, a speaker assembly, and a wireless communication module configured to receive a streaming signal representing a piece of musical content from a different electronic device;

the wireless communication module operable to receive at least a portion of the streaming signal via an asynchronous channel of ~~the~~ a localized communications signaling network after the audio system recognizes a selection of a selectable menu item presented on a display.

wherein the selectable menu item comprises a name for the piece of musical content and is associated with the piece of musical content;

the memory system comprising a buffer operable to buffer at least some of the streaming signal received by the wireless communication module; and

the speaker assembly operable to output a sound representing the piece of musical content.

Claim 16 (currently amended): The system of claim 15, wherein the audio system further comprises an in-band on-channel radio receiver and a communicative coupling means for receiving audio information from the different electronic device such that the audio system can use at least a portion of the audio information to initiate presentation of the selectable menu item on the display.

Claim 17 (original): The system of claim 15, further comprising instructions stored in the memory system and operable when executed to communicatively couple with a wireless telephone and to work with the wireless telephone while the wireless telephone is in a hands-free mode.

Claim 18 (original): The system of claim 15, further comprising a video presentation system that comprises the audio system.

Claim 19 (original): The system of claim 15, further comprising an automobile that comprises the audio system.

Claim 20 (original): The system of claim 15, further comprising instructions stored in the memory system and operable when executed to utilize the speaker assembly to output a call to a wireless telephone that is communicatively coupled to the audio system and in a hands-free mode.

REMARKS/ARGUMENTS

Provided herewith is a Terminal Disclaimer.

Also provided herewith are clean copies of listings from previously filed Information Disclosure Statements, per the request in the Office Action, and an additional Information Disclosure Statement.

The Specification and Title have been amended as requested. No new matter is added.

Also provided herewith is a Summary, which is taken from U.S Patent No. 7,187,947, to which the present application claims priority and which was previously incorporated by reference. No new matter is added.

Applicants respectfully traverse the §§ 102 and 103 rejections. Applicants also object to each instance of Official Notice taken by the Examiner. As shown above in the listing of the claims, Applicants have amended claims 1, 4, 7, 8, 15 and 16 in accordance with the telephonic interview conducted on April 23, 2013.

STATEMENT OF THE SUBSTANCE OF THE INTERVIEW

The first named inventor, Russell White, and the undersigned gratefully acknowledge and appreciate the time and consideration extended during a telephonic interview, which occurred on April 23, 2013. Taking part in the interview were Examiner Washington, Russell White, and the undersigned attorney, Mark Rozman. The interview began with a discussion of the primary reference Witkowski and the reasons why it fails to anticipate or render the claims obvious. In addition, the undersigned pointed out that the reference does not qualify as prior art, given the filing date of the Witkowski PCT application prior to November 29, 2000 (such that the Witkowski provisional application does not qualify as prior art). M.P.E.P. §706.02(f)(1) (example 6). Based on the discussion, it is believed that filing a Terminal Disclaimer in combination with the above amendments and remarks overcome the current rejections.

Discussed during the interview were various topics, including the claims and the structures associated with communicating media information between a wireless device and a recipient device to enable streaming content communication between the devices. Inventor White indicated that independent claims 1, 8 and 15 would be amended in accordance with the interview discussions. Inventor White also acknowledged that amendments to the independent

claims could affect dependent claims (e.g., creating antecedent issues that require amendments to dependent claims).

In connection with the discussion about the primary reference and its effective §102(e) prior art date, the parties to the call discussed the priority date for the pending claims and the proposed amendments. Inventor White and the undersigned appreciate the Examiner's thoughtful consideration and express determination that the as-filed claims of the present application are fully supported by the original as-filed parent specification of U.S. Patent Application No. 09/537,812, filed on March 28, 2000, which is now U.S. Patent No. 7,187,947. This support remains after the above amendment to the claims. As such and at the Examiner's request Applicants below identify a few of the 3/28/2000 specification quotes that support the claims. The listing is not intended to be complete. There is substantial support and several teachings throughout the 3/28/2000 specification, and a complete understanding of the support and teachings can best be gleaned by reading the entire document while referring back to the figures. In other words, the teachings build throughout the specification and one of ordinary skill in the art would understand that the disclosure teaches the reader to meld various combinations of the figures (e.g., 1, 2, 3, 4, and 9) and the descriptions associated with those various combinations into specific embodiments of the teachings.

The '947 Specification discloses, for example, that "information is communicated across a channel in an asynchronous manner to provide a continuous audio signal to the recipient." The specification explains, "[w]ith a display device for displaying a Website having selectable information, electronic device 300 may allow a user to select audio information via a user interface and receive the selected information via wireless communication thereby providing a customizable WebRadio device for the user. In another embodiment, electronic device 300 may be a modular device configured to be coupled to, for example, a portion of a cars interior. For example, electronic device 300 may be mounted to a portion of a car's console thereby providing a removably coupled electronic device operable to wirelessly receive selected audio information." Moreover, the specification teaches that an "electronic device 300 configured as a PDA and cellular phone may allow for communication with a users email account, voice mail account, the Internet, as well as allowing for the receipt of selected audio information via wireless communication. Electronic device 300 may be operable in a hands-free mode allowing a user to maintain safe driving fundamentals. During use, electronic device 300 may be processing

selective audio information for communicating with an automobile audio system and may further be operating to receive incoming cellular calls. Electronic device 300 may be set-up by the user to pause the music being played and allow the received cellular call to be communicated either via an independent speaker or utilizing the automobiles audio system. Additionally, electronic device 300 may be operable to adjust the listening level of an automobiles audio system, play received voice mail messages, allow a user to view the Internet, etc.” And, the specification goes on to describe how “radio dial 412 surpasses the limitations of conventional systems through providing a programmable radio dial of user customized audio information. Radio dial 412 includes several stations that may be programmed using program interface 413. The preset stations may include several different types of user customized preset information such as user selected playlists, internet broadcast stations, top 10 lists, group playlists, artist's selected lists, on-line radio station, conventional radio stations, Internet phone, cellular phone, etc. and other functions, features, or information associated with audio information. Radio dial 412 may also be displayed as a separate user interface and in some embodiments, does not require a `browsing` environment to view radio dial 412. For example, an electronic device, such as a PDA, having a display may graphically present radio dial 412 to a user. One example may be using electronic device in association with an automobile audio system. Electronic device may display radio dial 412 and may allow a user to navigate, modify, select, adjust volume, access daytimer, access phone lists, etc. or perform other functions while the electronic device is used in association with an automobile sound system. Therefore, radio dial 412 may be operable as an application for use with several different types of electronic devices (i.e., computer systems, portable computing devices, cellular phones, etc.) operable to display radio dial 412 and in come embodiments may be wirelessly communicated to an electronic device.”

In view of these remarks, the application is now in condition for allowance and the Examiner's prompt action in accordance therewith is respectfully requested. The Commissioner is authorized to charge any additional fees or credit any overpayment to Deposit Account No. 20-1504.

Respectfully submitted,

Privacy Act Statement

The Privacy Act of 1974 (P.L. 93-579) requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether the Freedom of Information Act requires disclosure of these records.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (i.e., GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspections or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.
