"Compliments to whoever decided to equip this boat with Digifins. Magnificent product. No boat should be without them! We have been completely free of Trouser Effect all trip, have avoided any infill by steering Fars coverage and they really saved our skins when the separation rope snapped."  
The Digifins kept their tailbuoys perfectly spread with 70 metre separations, for the whole day. It was a joy to behold! How did we ever manage without Digifins? Ah, that's right...we just used to have massive tangles!
