DATA PROCESSING OBJECTIVES

One of the most important objectives of seismic data processing is to produce readily interpretable sections. These sections must be geologically sound and represent the subsurface of the earth. They should be good enough to image the subsurface traps, where other seismic techniques may be used for qualitative analysis of some petrophysical properties of the reservoir rocks. Seismic sections are used for special applications such as direct hydrocarbon indicators, porosity presence, and some other applications that will be reviewed later in the text.

FACTORS AFFECTING SEISMIC DATA PROCESSING OBJECTIVES

Seismic data processing objectives are strongly affected by field data-acquisition parameters. They are also affected by the quality of the field work and the condition of the equipment. There is an impression that field problems can be solved in the data processing stages, using the magic of the computer software and the muscle of the hardware. The bad news is that some (but not all) field problems can be solved in the data processing center.

Marine conditions strongly affect the quality of the acquired data. Rough seas can cause streamer feathering, and a hard bottom will generate a variety of multiple reflections.

Seismic data are usually collected under conditions that are less than ideal. Although we may not have the most desired information, data

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
