REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The present invention describes a computerized document information handling method wherein "upon single entry of the execute command", the document is analyzed to determine if first information is contained therein, and if the first information is contained in the document, an information source is searched for second information associated with the first information using a record retrieval program. The closest prior art, Tso (U.S. patent 6,085,201) similarly teaches a context sensitive template engine which "generates a context-sensitive text message corresponding to an input text string". However, in Tso, the text string to be processed is determined by the current cursor position, as specified by the user [see col. 4, line 31 to col. 5, line 67], whereas the present invention "does not require the user to select the text string to be processed since it functions automatically upon a single click of an input device" to determine if the first information is contained within the document.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Crescelle dela Torre whose telephone number is (703) 305-9782.
