CLERK US DISTRICT COURT  
WESTERN DISTRICT OF TEXAS

IN THE UNITED STATES DISTRICT COURT  
FOR THE WESTERN DISTRICT OF TEXAS  
AUSTIN DIVISION

CROSSROAD SYSTEMS, INC.

Plaintiff,

v.

3PAR, INC.,  
AMERICAN MEGATRENDS, INC.,  
RORKE DATA, INC.,  
D-LINK SYSTEMS, INC.,  
CHELSIO COMMUNICATIONS, INC. ( a  
Delaware corporation).  
ISTOR NETWORKS, INC., and  
CHELSIO COMMUNICATIONS, INC. (a  
California corporation)

Defendants.

Case No. 1:10-CV-652-SS

DEPUTY

REPORT AND RECOMMENDATIONS OF THE SPECIAL MASTER  
REGARDING UNITED STATES PATENT NO.'S 7,051,147 & 6,425,035 B2

Attached hereto is the Special Master's Report and Recommendations to United States District Judge Sam Sparks regarding the construction of claims in United States Patent No.'s 7,051,147 & 6,425,035 B2.

The parties may file written objections to the recommendations made in this report within ten (10) days from the date of their receipt of it, as discussed at the conclusion of the *Markman* hearing.

SIGNED this the 9<sup>th</sup> day of August, 2011.

Karl Bayer  
Special Master

**CERTIFICATE OF SERVICE**

I hereby certify that on the 9<sup>th</sup> day of August, 2011, I electronically filed the foregoing with the Clerk of Court using the CM/ECF system which will send notification of such filing to counsel of record in this action.

/s/ Karl Bayer  
Karl Bayer

**SPECIAL MASTER'S RECOMMENDED CONSTRUCTIONS**  
**PATENT NO. 6,425,035 B2**

Term	Special Master's Recommended Construction
Device	No Construction Necessary.
Implement access controls for storage space on the storage devices.	"Provides controls which limit a device's access to a specific subset of storage devices or sections of a single storage device according to a map."
Allow access from devices...to the storage devices using native low level, block protocol.	"Permit or deny access using the NLLBP of the Virtual Local Storage without involving a translation from high level network protocols or file system protocols to a native low level block protocol request."
Native low level block protocol (NLLBP)	"A set of rules or standards that enable computers to exchange information and do not involve the overhead of high level protocols and file systems typically required by network servers."
Workstation	"A computer having input/output devices intended for use by humans."
Access control(s)	"Controls which limit a device's access to a specific subset of storage devices or sections of a single storage device according to a map."

Special Master's Proposed Construction of Disputed Terms					
Actual Claims Language	Crossroads' Proposed Construction	Crossroads' Evidence	Defendants' Proposed Construction	Defendants' Evidence	Special Master's Construction
<b>United States Patent No. 6,425,035 B2</b>					
<b>Claim 1:</b> A storage router for providing virtual local storage on remote storage devices to <b>devices</b> , comprising:	<b>Device:</b> "Computing device that issues storage access requests."	<b>Device:</b> <b>Intrinsic:</b> Claim 1, <sup>1</sup> Col. 9, ll. 27-30 ("devices" refers to the devices that make requests and are allowed access to storage devices).  Col. 1, ll. 36-37; Col. 2, ll. 4-5; Col. 4, ll. 55-56; Col. 8, ll. 65-68 (the specification describes the devices that make requests to access the storage devices as "computing devices").  Col. 1, ll. 57-60 ("from the perspective of a workstation, or other computing device, seeking to access such server data, the access is much slower than access to data on a local storage device").	<b>Device:</b> Computer.	<b>Intrinsic Evidence</b> 1:37-39 <sup>2</sup> , 47-49, 57-60  4:29-33 ("Storage router 56 combines access control with routing such that each workstation 58 has controlled access to only the specified partition of storage device 62 which forms virtual local storage for the workstation 58.")  4:39-40  4:58-59 ("no access from a workstation 58 is allowed to the virtual local storage of another workstation."  <i>Cf.</i> Fig. 2 and Fig. 3 --  First Reexam Reply <sup>3</sup> at 8-9, 15 --	No Construction Necessary.

<sup>1</sup> United States Patent No. 6,425,035 ("the '035 Patent") and United States Patent No. 7,051,147 ("the '147 Patent") share a common specification. To facilitate cross-referencing, unless noted otherwise, all Col:Line cites in the charts of proposed claim constructions are to the '035 Patent.

<sup>2</sup> As in the claim construction briefs previously submitted to the Court, all specification citations are to the '035 patent unless otherwise noted.

<sup>3</sup> For the sake of clarity, commonly cited documents are referenced in the "Defendants' Evidence" column by the abbreviated names used in prior briefing. A table of these abbreviations was included in Defendant's Reply Post-Hearing Brief and is also appended to this table.

**SPECIAL MASTER'S RECOMMENDED CONSTRUCTIONS**  
**PATENT NO. 7,051,147**

Term	Special Master's Recommended Construction
Device	No Construction Necessary.
Configuration	No Construction Necessary.
Access control(s)	"Controls which limit a device's access to a specific subset of storage devices or sections of a single storage device according to a map."
Allow access ...to the remote storage devices using native low level, block protocol.	"Permit or deny access using the NLLBP of the Virtual Local Storage without involving a translation from high level network protocols or file system protocols to a native low level block protocol request."
Initiator Device	"A device that issues requests for data or storage."
Native low level block protocol (NLLBP)	"A set of rules or standards that enable computers to exchange information and do not involve the overhead of high level protocols and file systems typically required by network servers."
Workstation	"A computer having input/output devices intended for use by humans."
Control Access	"To limit a device's access to a specific subset of storage devices or sections of a single storage device according to a map."
