## CONTENTS

Foreword .....	v
Preface .....	vii

### PART 1. OVERVIEWS

An introduction to the analysis of iterative coding systems .....	1
<i>Tom Richardson and Rüdiger Urbanke</i>	
Connections between linear systems and convolutional codes .....	39
<i>Joachim Rosenthal</i>	
Multi-dimensional symbolic dynamical systems .....	67
<i>Klaus Schmidt</i>	

### PART 2. CODES ON GRAPHS

Linear-congruence constructions of low-density parity-check codes .....	83
<i>J. Bond, S. Hui, and H. Schmidt</i>	
On the effective weights of pseudocodewords for codes defined on graphs with cycles .....	101
<i>G. David Forney, Jr., Ralf Koetter, Frank R. Kschischang, and Alex Reznik</i>	
Evaluation of Gallager codes for short block length and high rate applications .....	113
<i>David J.C. MacKay and Matthew C. Davey</i>	
Two small Gallager codes .....	131
<i>David J.C. MacKay and Matthew C. Davey</i>	
Mildly non-linear codes .....	135
<i>Alan Parks</i>	
Capacity-achieving sequences .....	153
<i>M.A. Shokrollahi</i>	

Hypertrellis: A generalization of trellis and factor graph.....	167
<i>Wai Ho Mow</i>	

## PART 3: DECODING TECHNIQUES

BSC thresholds for code ensembles based on “typical pairs” decoding .....	195
<i>Srinivas Aji, Hui Jin, Aamod Khandekar, David J.C. MacKay, and Robert J. McEliece</i>	
Properties of the tailbiting BCJR decoder .....	211
<i>John B. Anderson and Kemal E. Tepe</i>	
Iterative decoding of tail-biting trellises and connections with symbolic dynamics .....	239
<i>G. David Forney, Jr., Frank R. Kschischang, Brian Marcus, and Selim Tuncel</i>	
Algorithms for decoding and interpolation.....	265
<i>Margreet Kuijper</i>	
An algebraic description of iterative decoding schemes .....	283
<i>Elke Offer and Emina Soljanin</i>	
Recursive construction of Gröbner bases for the solution of polynomial congruences.....	299
<i>Henry O’Keeffe and Patrick Fitzpatrick</i>	
On iterative decoding of cycle codes of graphs.....	311
<i>Gilles Zémor</i>	

## PART 4. CONVOLUTIONAL CODES AND CODES OVER RINGS

Convolutional codes over finite Abelian groups: Some basic results .....	327
<i>Fabio Fagnani and Sandro Zampieri</i>	
Symbolic dynamics and convolutional codes .....	347
<i>Bruce Kitchens</i>	
Linear codes and their duals over artinian rings .....	361
<i>Thomas Mittelholzer</i>	

---

CONTENTS

xi

Unit memory convolutional codes with maximum distance ..... 381  
*Roxana Smarandache*

Basic properties of multidimensional convolutional codes ..... 397  
*Paul Weiner*

PART 5. SYMBOLIC DYNAMICS AND AUTOMATA THEORY

Length distributions and regular sequences ..... 415  
*Frédérique Bassino, Marie-Pierre Béal, and Dominique Perrin*

Handelman's theorem on polynomials with positive multiples ..... 439  
*Valerio de Angelis and Selim Tuncel*

Topological dynamics of cellular automata ..... 447  
*Petr Kůrka*

A spanning tree invariant for Markov shifts ..... 487  
*Douglas Lind and Selim Tuncel*

List of workshop participants ..... 499

# Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

## Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

## Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

## Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

## API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

## LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

## FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

## E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
